What is the bass scale in music theory? A bass scale is a series of notes played in a specific order, up and down the neck of your instrument. Every scale is made up of eight notes that are called an octave. The tone of each of these notes in an octave remains the same whether you're playing them on bass, guitar, or ukulele.

Do bassists only play root notes? As bass players, our number one job is to play roots. Anything else we do is extra, but playing the root of each chord is what we're most often expected to do. Unfortunately, basslines that consist of only roots can be boring for both the listener and the player.
