Can you fix a TV screen that went black? Sometimes a simple reboot can work wonders! If the connections seem fine, it's time to look at the settings on your TV. If you can still access your TV's menu, use your remote control to check if the TV is on the correct input. Sometimes, accidentally switching inputs can lead to a black screen.

Can the screen on a flat screen TV be fixed? Yes, flat-screen TV repair is possible, including issues with the screen. A flat-screen television typically can't be repaired if the screen is cracked or severely damaged.

How do I know if my TV backlight is broken? The easiest way to see if the backlights are working is to look through the TV's back cover and plug the TV in and turn on the TV and see if there is any light on the back. This can be difficult at times and it may help to turn off the lights to see if any light comes on.

How do I fix my screen when it says no signal? Try connecting the monitor with a different video cable. If the monitor still does not work, replace the monitor power cable. Replace or service the monitor if it still does not turn on. If your monitor won't turn on, unplug the power adapter of your monitor, and then plug it back into the power outlet.

Why is my TV screen black and no sound? First, I would suggest resetting the TV by unplugging it from power, then wait 1 to 2 minutes, plug it back in, and then try to use it again after it completely reboots. This will reset the microprocessor of the TV which may solve the issue.

Why is the TV not showing the picture? If you accidentally set the resolution to a value that your TV doesn't support, it may result in no picture being displayed. Resetting the display settings to default or factory settings might resolve the issue. Power Supply Problems: In certain cases, power supply issues can cause your TV to have sound but no picture.
