

# LG VOLT 2 STOCK ROM LG VOLT ANDROID FORUMS

## [Download Complete File](#)

**How do I reset my LG Volt 2?**

**How do I force a hard reset on my LG?** Press and hold the Power/Lock key (on the right side of the phone) and the Down Volume key (on the left side of the phone) at the same time. When the Factory data reset screen appears, release both of the keys. Use the Volume keys to highlight Factory data reset, then press the Power/Lock key to confirm.

**What is the code for LG master reset?** The code might be different from one model to another as well. Though, you can always dial `*##7780##` as it works with most Android devices.

**How do I reset my LG locked Android phone?** Press and hold the following keys at the same time: Volume Down Key + Power/Lock Key on the back of the phone. Release the Power/Lock Key only when the LG logo is displayed, then immediately press and hold the Power/Lock Key again. Release all keys when the Factory hard reset screen is displayed.

**How to remove previous Google account from Android after factory reset?**

**What does LG factory reset do?** If you forget your lock sequence and backup PIN, you'll have to perform a hard reset to gain access to your phone. Performing a hard reset deletes all of your user data, which includes pictures, videos, and music saved to your internal memory.

**What is lock master reset code?** The factory-set combination is 0-0-0-0. Push the reset lever left and down. The lever will remain in this position while you reset the combination. Rotate the dials to your desired combination.

**What is factory reset code?** 1. Hold the Volume up + Home + Power key at the same time. 2. Once the Android recovery mode appears, select: wipe data / factory reset with the volume keys. 3.

**What is the master reset code for Android?** The code \*2767\*3855# is a factory reset code that can be used to reset your Android phone to its factory settings. This will erase all of the data on your phone, including your password, apps, and settings.

**How to do a hard reset on LG washer?**

**Where is the reset button on a LG?** Press and hold the following keys at the same time: Volume Down Key + Power/Lock Key on the back of the phone. Release the Power/Lock Key only when the LG logo is displayed, then immediately press and hold the Power/Lock Key again. Release all keys when the Factory hard reset screen is displayed.

**How do I force my LG TV to reboot?**

**How to do a hard reset on LG TV?**

### **Teknisi Laptop: Pertanyaan dan Jawaban Penting**

Sebagai pengguna laptop, kita seringkali menghadapi masalah teknis yang membutuhkan bantuan dari seorang profesional. Teknisi laptop yang terampil dapat mendiagnosis dan memperbaiki berbagai masalah perangkat keras dan perangkat lunak, memastikan laptop Anda berfungsi dengan lancar kembali. Berikut adalah beberapa pertanyaan umum yang dapat membantu Anda memahami peran dan keahlian teknisi laptop:

**1. Pertanyaan: Apa saja tugas utama teknisi laptop? Jawaban:** Teknisi laptop bertanggung jawab untuk mendiagnosis, memecahkan masalah, dan memperbaiki segala jenis masalah yang terkait dengan laptop. Mereka juga dapat memberikan dukungan teknis, memperbarui perangkat lunak, dan membantu dengan masalah

keamanan.

**2. Pertanyaan: Keahlian apa yang dibutuhkan untuk menjadi teknisi laptop yang sukses? Jawaban:** Teknisi laptop harus memiliki pemahaman dasar tentang perangkat keras dan perangkat lunak komputer, serta keterampilan pemecahan masalah yang baik. Mereka juga harus mengikuti perkembangan teknologi laptop terbaru dan mengikuti pelatihan atau sertifikasi yang relevan.

**3. Pertanyaan: Bagaimana cara menemukan teknisi laptop yang andal? Jawaban:** Cari teknisi laptop yang memiliki reputasi baik, pengalaman yang relevan, dan keterampilan yang sesuai. Tanyakan teman atau rekan kerja untuk rekomendasi atau baca ulasan online dari pelanggan sebelumnya.

**4. Pertanyaan: Apa saja indikasi bahwa laptop saya membutuhkan bantuan teknisi? Jawaban:** Beberapa tanda yang menunjukkan perlunya perbaikan oleh teknisi laptop antara lain: layar kosong, masalah startup, kerusakan perangkat keras, masalah perangkat lunak yang parah, atau virus yang tidak dapat dihapus.

**5. Pertanyaan: Berapa perkiraan biaya untuk layanan teknisi laptop? Jawaban:** Biaya layanan teknisi laptop bervariasi tergantung pada tingkat masalah dan lokasi Anda. Umumnya, Anda dapat mengharapkan untuk membayar biaya per jam ditambah biaya untuk suku cadang atau perbaikan tambahan.

#### **Solutions of Hatcher Algebraic Topology Exercise 4**

**Question:** Let  $X$  be a space and let  $A \hookrightarrow B \hookrightarrow X$  be subspaces. Show that  $H_n(A, B) \cong \text{Ker}(H_n(A) \rightarrow H_n(B))$ .

**Answer:**

Consider the exact homology sequence of the pair  $(B, A)$ :

$$\dots \rightarrow H_{n+1}(B, A) \rightarrow H_n(A) \rightarrow H_n(B) \rightarrow H_n(B, A) \rightarrow H_{n-1}(A) \rightarrow \dots$$

By the definition of relative homology, we have  $H_n(B, A) \cong H_n(A, B)$ . Therefore, the homology group  $H_n(A, B)$  is isomorphic to  $\text{Ker}(H_n(A) \rightarrow H_n(B))$ .

**Question:** Let  $X$  be a space and let  $A \hookrightarrow X$  be a subspace. Show that the inclusion map  $i: A \hookrightarrow X$  induces a surjection  $i_*: H_n(A) \rightarrow H_n(X)$ .

---

**Answer:**

Consider the exact homology sequence of the pair  $(X, A)$ :

$$\dots \rightarrow H_{n+1}(X, A) \rightarrow H_n(A) \rightarrow H_n(X) \rightarrow H_n(X, A) \rightarrow H_{n-1}(A) \rightarrow \dots$$

By the excision theorem, we have  $H_{n+1}(X, A) = 0$ . Therefore, the map  $i^*: H_n(A) \rightarrow H_n(X)$  is surjective.

**Question:** Let  $X$  be a space and let  $A, B \subset X$  be subspaces such that  $A \cap B = \emptyset$ . Show that there is an exact sequence:

$$\dots \rightarrow H_n(A) \oplus H_n(B) \rightarrow H_n(A \cup B) \rightarrow H_{n-1}(A) \oplus H_{n-1}(B) \rightarrow \dots$$

**Answer:**

Consider the exact homology sequence of the three-way intersection:

$$\dots \rightarrow H_{n+1}(X, A \cup B) \rightarrow H_n(A \cup B) \rightarrow H_n(A) \oplus H_n(B) \rightarrow H_n(X) \rightarrow \dots$$

By the excision theorem, we have  $H_{n+1}(X, A \cup B) \cong H_{n+1}(A \cup B, A \cup B)$ . Since  $A \cap B = \emptyset$ , we have  $H_{n+1}(A \cup B, A \cup B) = 0$ . Therefore, the exact sequence simplifies to:

$$\dots \rightarrow H_n(A) \oplus H_n(B) \rightarrow H_n(A \cup B) \rightarrow H_{n-1}(A) \oplus H_{n-1}(B) \rightarrow \dots$$

**Question:** Let  $X$  be a space and let  $A \subset X$  be a subspace. If  $A$  is a deformation retract of  $X$ , then the inclusion map  $i: A \rightarrow X$  induces an isomorphism  $i_*: H_n(A) \rightarrow H_n(X)$ .

**Answer:**

Since  $A$  is a deformation retract of  $X$ , there is a continuous map  $f: X \rightarrow A$  such that  $f \circ i = 1_A$ . Consider the exact homology sequence of the pair  $(X, A)$ :

$$\dots \rightarrow H_{n+1}(X, A) \rightarrow H_n(A) \rightarrow H_n(X) \rightarrow H_n(X, A) \rightarrow H_{n-1}(A) \rightarrow \dots$$

By the excision theorem, we have  $H_{n+1}(X, A) = 0$ . Since  $f$  is a continuous map, it induces a homomorphism  $f_*: H_n(X) \rightarrow H_n(A)$ . By the naturality of homology, we have  $i_* f_* = 1_{H_n(A)}$ . Therefore,  $i_*$  is a monomorphism. Since  $H_n(A) \subset \text{Ker}(H_n(A) \rightarrow H_n(X))$ , we have  $i_*$  is also an epimorphism. Thus,  $i_*$  is an isomorphism.

## **Solution Romer Advanced Macroeconomics 3rd**

**Question:** What is the Ramsey growth model?

**Answer:** The Ramsey growth model is a neoclassical economic growth model that predicts that optimal economic growth depends on the trade-off between present consumption and future investment. It shows that the optimal capital stock is determined by a balance between the desire for immediate consumption and the need for future growth.

**Question:** Explain the Solow growth model.

**Answer:** The Solow growth model is a simplified neoclassical growth model that focuses on exogenous technological progress. It predicts that the economy will eventually reach a steady state with constant capital and output per worker. Technological progress is the sole driver of long-run growth in this model.

**Question:** Describe endogenous growth models.

**Answer:** Endogenous growth models attempt to explain the sources of economic growth from within the model itself, rather than relying on exogenous factors like technological progress. They typically incorporate features such as human capital accumulation, innovation, and research and development.

**Question:** Discuss the role of government in economic growth.

**Answer:** The role of government in economic growth is complex and multifaceted. Governments can play a role in promoting growth through policies that encourage investment, innovation, and human capital development. However, excessive government intervention can also stifle growth by creating distortions and inefficiencies.

**Question:** What is the golden rule of capital accumulation?

**Answer:** The golden rule of capital accumulation is a result derived from the Ramsey growth model. It states that the optimal capital stock is that which maximizes steady-state consumption per person. This occurs when the marginal rate of substitution of consumption today for consumption tomorrow is equal to the real

interest rate.
