This manual outlines five essential questions and answers to help you embark on your Wing Chun journey.

1. What is the Stance in Wing Chun?

The Wing Chun stance is characterized by a low, stable position with the feet shoulder-width apart and slightly turned inward. The knees are slightly bent, with the weight evenly distributed on both feet. This stance provides excellent balance and agility, allowing for quick and efficient movements.

2. How to Strike in Wing Chun?

Wing Chun strikes are executed with precision and power. The most common strikes are the "direct punch" (bong sau), "rear punch" (daang sau), and "hook punch" (pak sau). These strikes are delivered in a straight line, focusing on the opponent's vital points.

3. What is the Trapping Technique in Wing Chun?

Trapping is a unique element of Wing Chun that involves using the opponent's momentum against them. By controlling their limbs or body, you can disrupt their balance and create openings for your strikes. The "lop sao" (hand chop trap) and "pak sao" (hook trap) are two essential trapping techniques.

4. How to Develop Footwork in Wing Chun?

Footwork is vital in Wing Chun for maintaining balance, evading attacks, and setting up strikes. The "three-step drill" (jum sao) is a fundamental exercise that improves footwork and coordination. This drill involves a series of steps in which you switch between forward, backward, and side movements.

5. What is Chi Sau (Sticky Hands)?

Chi Sau is a training method in Wing Chun that focuses on developing sensitivity and adaptability.
