**Why can't humans eat like dogs?** Carnivores have short intestinal tracts that allow meat to pass quickly through their digestive system. Humans' intestinal tracts are

**What is the argument for animal protein?** Our bodies create 11 of them (these are called "non-essential amino acids"), but we must get the other 9 from food (essential amino acids). **Is it morally acceptable to eat animals?** If you accept that animals have rights, raising and killing animals for food is morally wrong. An animal raised for food is being used by others rather than being respected for itself. In philosopher's terms it is being treated as a means to human ends and not as an end in itself.

**Why can't dogs eat pig?** Eating raw or undercooked pork is not safe for dogs or humans due to the parasite trichinella spiralis larvae, which can cause a parasite infection known as trichinosis.
