How to use Excel as a quantity surveyor?

What are 10 functions of a quantity surveyor?

How do you calculate quantity in estimation? Quantity estimate Cost estimates are calculated by multiplying the dimensions of the project with the per-unit cost. For example, a painter has to paint a building, and the cost per square foot is Rs. 5, then he calculates the total cost by multiplying the total square feet area with the per square feet cost.

What is the formula to calculate quantity? You calculate the net quantity according to one of the following formulas: If the physical quantity is Length: Net quantity = length x number of units. If the physical quantity is Area (m²): Net quantity = length x width x number of units. If desired, you can overwrite the calculated net quantity with a different value.

From this, find the height of the instrument (HI) and point elevations, with $HI = E(BM) + BS$ and $E(\text{point}) = HI - FS$.

How do you calculate quantity ratio?

How do you calculate excavation quantity? $Ab = Wb * Lb$, where Wb and Lb are the width and length of the bottom of the excavation. $At = Wt * Lt$, where Wt and Lt are the width and length of the top of the excavation. In our example, $Wb = Lb = 5$ and $Wt = Lt = 15$, so $Ab = 5 * 5 = 25$ and $At = 15 * 15 = 225$, and $D = 5$. Therefore, the volume is: $= 542 \text{ cf}$ or 20.0 cy .

What is the formula of scale in surveying?

How do you calculate survey scale? Step 1: For each question on the questionnaire, calculate the total number of responses for each sentiment level (Strongly Disagree, Disagree, Neutral, Agree, Strongly Agree). Step 2: Add the totals, and divide by the total number of respondents: $1 + 0 + 0 + 0 + 5 = 6 / 2$ respondents = 3.

What is the formula for ratios? If you are comparing one data point (A) to another data point (B), your formula would be A/B . This means you are dividing information A by information B. For example, if A is five and B is 10, your ratio will be $5/10$. Solve the equation. Divide data A by data B to find your ratio.
