What is the fail rate for the APES exam? You'll want to note the passing rate for the AP® Environmental Science exam if you are looking to use the course for college credit. At around 50%, this exam has the second lowest passing rate among the AP® science courses.

Is a 4 on APES good? Receiving a 3, 4, or 5 is commonly accepted as scoring well on an AP® exam. According to the College Board a 3 is 'qualified,' a 4 'well qualified,' and a 5 'extremely well qualified.' Is there a curve on the APES exam? To start off, the AP Scoring process isn't exactly a curve in a traditional sense, but rather a process called "equating". Essentially, the College Board uses statistical processes to ensure that scores are comparable from year to year, adjusting for potential variances in test difficulty.

Is there a break during the APES exam? There will also be a break between the multiple-choice/short-answer section and the free-response section, typically about 10 minutes. Some variability might occur with starting times or length of breaks depending on the testing site administration, but this is generally what you can expect.

What is the shortest AP exam? Hey there! I'd be happy to help you with your question about AP exams. The shortest AP exams are typically those without essays, and as of the last few years, the AP Physics C: Mechanics exam has been the briefest. It's only 90 minutes long, consisting of multiple-choice questions followed by free-response questions.

What is the 10% rule in APES? The ten percent rule states that each trophic level can only give 10% of its energy to the next level. The other 90% is used to live, grow, reproduce and is lost to the environment as heat. All energy pyramids start with energy from the Sun which is transferred to the first trophic level of producers.

Is a 70 a 5 on the AP exam? Usually, a 70 to 75 percent out of 100 translates to a 5. However, there are some exams that are exceptions to this rule of thumb.
