lines, and allow skin care products to penetrate more effectively.

How often should I exfoliate?

The frequency of exfoliation depends on your skin type. If you have dry or sensitive skin, you should exfoliate once or twice a week. If you have oily or acne-prone skin, you can exfoliate more often, up to three times a week.

What are some different types of exfoliators?

There are two main types of exfoliators: physical and chemical. Physical exfoliators use abrasive particles to scrub away dead skin cells, while chemical exfoliators use acids to dissolve them.

How do I choose the right exfoliator for my skin type?

If you have dry or sensitive skin, you should choose a gentle physical exfoliator with fine particles. If you have oily or acne-prone skin, you can use a stronger physical exfoliator or a chemical exfoliator.
