**What is hotel investment management?** Hotel asset management involves managing the investment to meet the specific goals of the owner. The role of the Hotel Asset Manager involves increasing the value of the asset and of the portfolio.

**Why invest in hotel industry?** Additionally, investing in hotels can add a layer of diversification to an investor's portfolio. The economic drivers in the hotel industry often differ from those in other real estate sectors, such as residential or office spaces, providing a buffer against market fluctuations in these areas.

**What is the average ROI on hotel investment?** Experts in the field, however, often state that full service hotels see yearly returns of 10–14% and low service hotels between 8–12%. One important factor is occupancy rates. Higher occupancy results in increased room revenue and profits.

This diversified revenue stream can provide a steady income over the long term.
