Question and Answer with Stern's Introductory Plant Biology, 13th Edition

Paragraph 1

- **Question:** Define primary meristems and where are they found?
- **Answer:** Primary meristems are tissues that produce new primary plant growth and are located at the tips of roots and shoots.

Paragraph 2

- **Question:** Explain the role of secondary meristems.
- **Answer:** Secondary meristems produce secondary growth in plants by increasing the diameter of stems and roots, resulting in thicker and more complex structures.

Paragraph 3

- **Question:** Describe the different types of vascular tissue.
- **Answer:** Vascular tissue consists of xylem and phloem. Xylem transports water and minerals, while phloem transports sugars and other nutrients throughout the plant.

Paragraph 4

- **Question:** What is the function of guard cells?

- **Answer:** Guard cells regulate the opening and closing of stomata, which are pores on leaves that allow for gas exchange and transpiration.

Paragraph 5

- **Question:** Explain the significance of phototropism and gravitropism.
- **Answer:** Phototropism is the plant's response to light, allowing it to grow towards sunlight, while gravitropism is the plant's response to gravity, helping it to orient its roots and shoots in the appropriate direction.

Which artist is famous for painting simple geometric elements? Famous abstract artists such as Wassily Kandinsky, Piet Mondrian, and Kazimir Malevich are celebrated for their contributions to geometric abstraction. Their bold geometric paintings and compositions have become iconic representations of the movement, pushing boundaries and defying traditional artistic norms.

What is the meaning of composition in art? Composition is the way in which different elements of an artwork are combined or arranged. The artist has complete freedom when choosing the composition of their artwork. Elements may all be clustered towards the centre of the canvas or photograph, or spread out in the corners of the piece.

What element of art is geometric? A shape is two-dimensional and includes geometrical and organic shapes. Geometric shapes have clear edges and

boundaries and are defined by mathematic terms. They include triangles, squares, rectangles, circles, polygons, etc.

What is geometric art called? Geometric abstraction is a form of abstract art based on the use of geometric forms sometimes, though not always, placed in non-illusionistic space and combined into non-objective compositions.

What are the three rules of composition in art? Here, I take a look at three compositional standards – Rule of Thirds, The Golden Mean, and the Golden Triangle – and apply them to a single subject to illustrate how each serves as starting points for planning a painting.

What is the rule of odds in art? The "rule of odds" suggests that an odd number of subjects in an image is more interesting than an even number. Thus if you have more than one subject in your picture, the suggestion is to choose an arrangement with at least three subjects.

What are the seven elements of art? The seven elements of art are line, shape, space, value, form, texture, and color. These elements are the building blocks, or ingredients, of art. A line is a mark made on a surface.

What art style is based on geometric shapes? Geometric abstraction can be thought of as a subcategory of abstract art, and as the title suggest, it is based on geometric forms and shapes. Abstract art creates an art work that is expressive, unique, and thought provoking.

What is geometric composition in art? This chapter focuses on an important layout technique in graphic design often referred to as geometric composition, which entails dividing the canvas into smaller parts and using these divisions to arrange the visual elements.

Why is geometry important in art? Artists have studied geometry in order to draw angles, proportion, and perspective, in order to illustrate or emote the illusion of realism. Geometric forms, currently, are explored and seen everyday in our surroundings.

Is Mandala a geometric art? The word mandala arises from the Sanskrit and means sacred circle. The circle symbolizes the womb of creation; and mandalas are

geometric designs that are made through uniform divisions of the circle.

Who first made geometric art famous? In Russia, the language of geometric abstraction first appeared in 1915 in the work of the avant-garde artist Kazimir Malevich (1879–1935) (Museum of Modern Art, New York), in the style he termed Suprematism.

What is the opposite of geometric in art? Geometric and organic In contrast, organic shapes are free-form, unpredictable, and flowing in appearance. These shapes and organic forms visually suggest the natural world of animals, plants, sky, sea, etc...

What is the golden rule in art? With a proportion equal to $x^2=x+1$, the golden ratio in art creates a balanced relationship that the mind's eye loves. More precisely, it is about obtaining a precise ratio between the different parts of a work, an image, or an object. The value of this number is 1.61803398874989482045.

What is the golden rule of composition? This is how it works: Imagine your picture plane, then divide it by thirds of both horizontal and vertical lines. Now, you have grid-like divisions across the whole surface. The four points where the horizontal and vertical lines intersect each other will be the best placements for your focal points.

What is the Golden Triangle in art? The golden triangle is a compositional technique that urges you to position your key photographic elements along imaginary triangles in your scene.

What is the rule of space in art? Objects in motion need a little lead room — space into which they appear to move. The nuts and bolts: The rule of space says that you should have more space in front of the subject than behind, thus giving the subject space to move into within the picture.

What are the golden rules of drawing? The golden ratio (also known as the golden section, and golden mean) is the ratio 1:0.62. Use it to divide lines and rectangles in an aesthetically pleasing way. In the above square A is 0.62 of the rectangle. Square B is 0.62 of square A.

What is the number one rule of drawing? Rule #1 suggests that it's easier to work from the general to the specific rather than the other way around. Start with the largest shape you see. Forget everything else and draw that shape. It may be the outer silhouette of a person or subject, or it may be a shape that includes more than one object.

What is the most important element of art? Line: A very important Element of Art is "Line". Imagine a work of art with no use of lines. Whether it is a drawing, painting, or sculpture, lines are important. They help form shapes, and also can communicate an idea or feeling.

What is art in simple words? Art is the expression of ideas and emotions through a physical medium, like painting, sculpture, film, dance, writing, photography, or theatre. If you love the creative process, maybe you'll devote your life to art.

What is the color element of art? Color An element of art made up of three properties: hue, value, and intensity. Intensity: quality of brightness and purity (high intensity= color is strong and bright; low intensity= color is faint and dull) Texture An element of art that refers to the way things feel, or look as if they might feel if touched.

Who first made geometric art famous? In Russia, the language of geometric abstraction first appeared in 1915 in the work of the avant-garde artist Kazimir Malevich (1879–1935) (Museum of Modern Art, New York), in the style he termed Suprematism.

Who is the artist who uses geometric shapes? A few artists that use geometric shapes include: Pablo Picasso, co-founder of Cubism in 1907 in France and Spain. Georges Braque, co-founder of Cubism in 1907 in France and Spain. Kazimir Malevich, founder of Russian Suprematism in 1915.

Who discovered geometric art? One of the pioneers and most emblematic artists of abstract geometric art was Kazimir Malevich, who founded the Suprematist movement. His purpose was the search of an absolute and pure expression, nonfigurative, unlike customary art.

Who is the artist known for geometry and primary colors? Piet Mondrian, a Dutch painter and pioneer of abstract art, is renowned for his iconic style characterized by geometric shapes and primary colors.

Who is the female artist of geometric art?

Which artist discovered the principle of geometric perspective? In its mathematical form, linear perspective is generally believed to have been devised about 1415 by the architect Filippo Brunelleschi (1377–1446) and codified in writing by the architect and writer Leon Battista Alberti (1404–1472), in 1435 (De pictura [On Painting]).

Who was the first person to use math in art? One of the oldest known artists to consciously incorporate maths into his works was Ancient Greek High Classical Sculptor Polykleitos (Polyclitus) of Argos during the 5th Century BCE.

What is drawing with lines called? Line art or line drawing is any image that consists of distinct straight lines or curved lines placed against a background (usually plain). Two-dimensional or three-dimensional objects are often represented through shade (darkness) or hue (color).

What is color in art? Color, in a simple definition, is light reflected by an object. Color can affect how people feel and is symbolic. In art, a color theory exists. Color theory includes the color wheel, color value, and color schemes. Color is a part of all art and is all around us!

Why do people like geometric art? One of the key reasons why people are drawn to modern geometric abstract art is its ability to evoke a sense of order and harmony in a chaotic world. Artists like Piet Mondrian, with his iconic compositions of grids and primary colors, sought to distill the underlying harmony of the universe into geometric forms.

Who is the father of geometry? Euclid was a Greek mathematician who is considered to be the "father of geometry," and he was basically the founder of geometry as it is known today. Born in 325 BC, the Euclid biography is one of a man who spent most of his life in the City of Alexandria.

What replaced the geometric style? Final answer: The beveled style, recognized for its swirling motifs, replaced the geometric style and often included geometric, floral, and animal motifs. The Third Style of Roman painting and the arabesque pattern in Islamic art also highlight the diverse use of motifs in historical art periods.

What is the style of geometric painting? Geometric art is a phase of Greek art, characterized largely by geometric motifs in vase painting, that flourished towards the end of the Greek Dark Ages and a little later, c. 1050–700 BC. Its center was in Athens, and from there the style spread among the trading cities of the Aegean.

What artist is famous for geometric shapes? Piet Mondrian is the most famous De Stijl artist and this particular piece is a very structured, rigid compilation. It is composed of perpendicular lines, some with greater thickness than others. The lines form rigid squares and rectangles.

Which artist was called the master of color? Henri Matisse 1869-1954 - Master Of Colour.

Who is the artist that uses one color? In the twentieth century, with the rise of abstract art many artists experimented with making monochrome paintings including Anish Kapoor, Ad Reinhardt, Robert Rauschenberg and Robert Ryman.
