## **The Death and Life of the Great American School System: How Testing, Choice, and Vouchers Are Undermining Education**

By Diane Ravitch

### **Introduction**

In her seminal work, "The Death and Life of the Great American School System," Diane Ravitch argues that the current educational landscape in the United States is plagued by a relentless focus on standardized testing, school choice, and vouchers, undermining the quality of education for students.

### **Question 1: What is the problem with standardized testing?**

**Answer:** Ravitch argues that standardized testing is often used to label schools and students as failures, rather than to inform instruction and improve teaching. She

contends that the tests are biased, culturally insensitive, and do not accurately measure student learning.

**Question 2: How does school choice undermine education?**

**Answer:** Ravitch believes that school choice creates a two-tiered system of education, pitting public schools against private schools and exacerbating existing inequities. She argues that public schools should be supported and improved for all students, rather than facilitating the privatization of education.

**Question 3: What are the limitations of vouchers?**

**Answer:** Ravitch contends that vouchers are a form of school choice that does not address the underlying problems in public education. She argues that vouchers often fund religious schools, divert public funds from public schools, and can result in a loss of accountability for student outcomes.

**Question 4: What is the solution?**

**Answer:** Ravitch proposes a return to evidence-based educational practices, such as investing in early childhood education, providing adequate teacher training, and creating a supportive learning environment for all students. She argues that true reform should focus on improving public schools for all, rather than seeking quick fixes through standardized testing and school choice.

**Conclusion**

Ravitch's critique of the educational system in the United States serves as a call to action to reconsider the current emphasis on testing, choice, and vouchers. She urges a return to the fundamental principles of public education, where all students have access to a quality education that prepares them for success in college, career, and life.
