

An english spanish contrastive analysis of culturally

[Download Complete File](#)

What is an example of contrastive analysis in English? For example, contrastive analysis of English and Chinese would reveal that while the two languages share the same word order (Subject-Verb-Object), Chinese—unlike English—does not have a system of definite and indefinite articles (a, an, the).

What is contrastive analysis of two languages? Contrastive analysis (CA) is the systematic comparison of two or more languages, with the aim of describing their similarities and differences. CA has often been done for practical/pedagogical purposes. The aim has been to provide better descriptions and better teaching materials for language learners.

What is the Lado contrastive analysis hypothesis? Lado (1957) believes that the degree of difference between the two languages also correlated with the degree of difficulty. Later on, however, the analysis attention was drawn to similarities between languages, because language teaching was extended to benefit from such information.

Who is the proponent of contrastive analysis? The main idea of contrastive analysis, as propounded by Robert Lado in his book *Linguistics Across Cultures* (1957), was that it is possible to identify the areas of difficulty a particular foreign language will present for native speakers of another language by systematically comparing the two languages and cultures.

What are the four steps of contrastive analysis? Whitman's proposed contrast analysis consists of four steps, i.e., description, selection, contrast and prediction, each of them described as follows: ...

What are the three versions of contrastive analysis? Hence, some methods are developed to explain why some features of a target language were more difficult to acquire than others. Contrastive analysis hypothesis (CAH) consists of three versions including, the strong version, the weak version, and the moderate version.

How to write a contrastive analysis? A contrastive analysis must proceed through four steps: description, selection, contrast, and prediction. Most analyses are weakened by insufficient care at one or more of these steps, each of which is beset with problems.

What are the 5 steps of conducting contrastive analysis? Steps for Contrastive Analysis CA can be broken down to a set of component procedures. The five steps for making a systematic comparison and contrast of any two languages are: Selection - description - comparison - prediction - verification.

What is criticism against contrastive analysis? The criticism is that Contrastive Analysis hypothesis could not be sustained by empirical evidence. It was soon pointed out that many errors predicted by Contrastive Analysis were inexplicably not observed in learners' language. Even more confusingly, some uniform errors were made by learners irrespective of their L1.

What are the weaknesses of contrastive analysis hypothesis? Their arguments are based on two justifications: first, contrastive analysis is not reliable to predict the interference problems of a language learner; and second, interference of native language plays such a small role in language learning performance that no contrastive analysis could correlate highly with ...

What are the principles of contrastive analysis? A classical contrastive analysis consists of three steps, not always clearly distinguishable in the analysis itself but always tacitly assumed: (1) description; (2) juxtaposition; (3) comparison, i. e., contrastive analysis in the strict sense.

What is the difference between contrastive analysis and contrastive analysis hypothesis? The term "contrastive hypothesis" refers to the theory itself while "contrastive analysis" focuses on the method of implementation of the hypothesis. On the other hand, "contrastive analysis hypothesis" emphasizes both the theory and

method simultaneously.

What are examples of contrastive analysis?

Who is the pioneer of contrastive analysis? History. The theoretical foundations for what became known as the contrastive analysis hypothesis were formulated in Robert Lado's *Linguistics Across Cultures* (1957).

What is the methodology of contrastive analysis? Contrastive Analysis It emphasized the comparison of two languages = the mother tongue of the learner and the L2 that he wants to learn. Learning a new language will, thus, be learning a new set of habits and will inevitably be influenced by the old set of habits -i.e. the mother tongue.

What are the two general principles of executing a contrastive analysis? There are two general principles to executing a CA which are (1) description and (2) comparison.

Is contrastive analysis a theory? Is a theory of second language acquisition; it is based on comparing two or more language to identify the similarities and differences.

What is the contrastive analysis hypothesis by Lado? According to the contrastive analysis hypothesis formulated by Lado (1957), difficulties in acquiring a new (second) language are derived from the differences between the new language and the native (first) language of a language user.

What is a strong version in contrastive analysis? The first form of the CAH which we wish to consider is the "strong" version. This is the variety of CA made famous by Lado (1957) which states that wherever there are differences between the student's native language and the target language, there will be interference from the native language.

What is the hierarchy of difficulty? 1.1.1 Hierarchy of difficulty Hierarchy of difficulty was derived from Lado's (1957) Contrastive Analysis hypothesis by Stockwell and Bowen. The hierarchy seeks to predict likely difficulties to be encountered by second language learners based on the effect of their first languages.

What do you mean by interlanguage? To sum up, interlanguage is a linguistic system created by second language learners to assist their second language acquisition. Rules are created by individual learners, so they are unique for every learner. Interlanguages are systematic, but they are also open to changes, which take place with progress.

What are examples of contrastive sentences? Below are a few more examples of contrastive stress in individual sentences: He wasn't sure if he wanted to stay, or go. Did you want to go over this now, or later? She thinks the report needs more work, but her partner thinks it's finished.

What is an example of contrastive distribution in English? Contrastive distribution is where two sounds in a language, when placed in identical contexts, produce different meanings. For example, in English we have two bilabial consonants, [b] and [p]. These consonants are in contrastive distribution — “bear” and “pear”.

What is an example of analysis in English? Examples of analysis in a Sentence a scientific analysis of the data make a chemical analysis of the soil a detailed analysis of the bone structure of horses performing chemical analysis of the soil The newspaper printed an analysis of each candidate's positions. That's not a bad analysis of the situation.

What is an example of contrastive structure?
