**What caused the war in Gears of War?** The war began on Emergence Day, when the Locust emerged from the underground caverns of the Hollow and eliminated one quarter of the human population. In the months after E-Day, the Locust advanced across the surface of Sera and overran most of the planet.

**How did the locust survive Gears 1?** While many Locust died, most of them survived due to residing underground in the Hollow. Much of the planet became polluted and those who were outside of the Plateau and survived the Hammer Strikes became resentful of the Coalition for sacrificing civilians. The survivors formed gangs and became known as the Stranded.
