

# Bobcat engine oil specifications 331

## [Download Complete File](#)

**How much oil does a Bobcat 331 hold?** 1 Gal. \*See your Bobcat Dealer for a complete selection for your Bobcat machine. Hydraulic/Hydrostatic Fluid (1 Gal.)\* Synthetic Hydraulic Fluid (1 Gal.)\*

**What type of engine oil does a bobcat use?** Many machines roll off the production line with a 10W-30 weight oil, which offers the best performance in temperatures typically ranging from minus 20 degrees Fahrenheit (F) to 90 degrees F.

**What engine is in a Bobcat 331?**

**What is the difference between bobcat 331 and 334?** Bobcat 334 Mini Excavator  
Larger and more powerful than the Bobcat 331 model, the Bobcat 334 is extremely durable and can be found on construction sites across the country.

**How often do you change Bobcat oil?**

**What is Bobcat hydraulic oil?**

**What brand engine does Bobcat use?** Engine and Transmission Bobcat first used Kubota engines before switching to Tier IV Doosan engines in 2015. The Doosan diesel oxidation catalyst (DOC) engine tends to run hotter and burn more fuel. Kubota's diesel particulate filter (DPF) design allows you to throttle up and get to work 60-90 seconds quicker.

**What is a Tier 4 engine in a Bobcat?** Bobcat engines meet Tier 4 regulations without a diesel particulate filter (DPF). This reduces downtime that occurs with DPF regeneration and minimizes long-term DPF maintenance costs.

**Can you use AW46 in a Bobcat?** In all likelihood yes. I use this fluid for jacks and lifts that do not see the duty cycle or environment of a Bobcat. The Bobcat manual should list manufacturers approved fluids. If not, I would suggest making a phone call to a Bobcat dealer or service center.

**What is the difference between Bobcat 430 and 331?** Both have around 40 net horsepower, and both dig to a depth of slightly more than 10 feet. The 430 weighs more, however—8,024 pounds, versus the 331's 7,215 pounds—the result, primarily, of its enlarged undercarriage and its use of twin blade cylinders (the 331 uses just one).

**What is the hydraulic pressure on a Bobcat 331?** the 331 has a hydraulic pressure of 2600 at 15.9 gph. i know you can increase the pressure. i have a 07 bobcat 331 track hoe.

**Who makes Bobcat engines now?** New Bobcat branded engines, built by the Doosan Infracore Engine Business Group, will be fitted to selected machines greater than 37kW (50hp) from next year. Bobcat is also owned by Doosan, the Korean conglomerate.

**What size track is a 331 Bobcat?**

**How much does a Bobcat 331 E weigh?** How much does a Bobcat 331E Mini Excavator weigh? The standard operating weight for a Bobcat 331E Mini Excavator is 7507 lbs. This weight can vary depending on the machine configuration and attachments.

**What do Bobcat numbers mean?** The four-digit number identifies the model number and engine combination, which is helpful if your Bobcat ever needs maintenance. The five-digit Production Sequence Number identifies the order in which the loader is produced, which is also helpful for ordering parts or getting maintenance work done.

**How much oil does a Bobcat mower take?** Oil Capacity 1.1 gal. (4.5 qt.)

**How much oil does a drum engine hold?** Blue Mild Steel Engine Oil Barrel, Capacity: 200-250 litres.

**How much oil does a Bobcat 732 take?** 3.5 gal. (13 Ltr.)

**How much hydraulic oil does a Bobcat 341 hold?** 1 Gal. Subject to change without notice. Consult your Bobcat Operation & Maintenance Manual. Hydraulic Cap Hydraulic/Hydrostatic Fluid (1 Gal.)\*
