The Procrastination Equation: How to Stop Putting Things Off and Start Getting Stuff Done

In his book "The Procrastination Equation," Piers Steel delves deep into the psychology of procrastination and offers practical strategies to overcome it.

Q: What is the "procrastination equation"?

A: Steel's equation is $U + E + V < H$. It suggests that procrastination occurs when the perceived unpleasantness (U) and effort (E) of a task outweigh the subjective value (V) of the task and our expectation of success (H).

Q: How do I determine the U, E, V, and H factors for a task?

A: To calculate U, consider how aversive you find the task. For E, estimate the amount of work and difficulty involved. V represents the personal importance and potential benefits of the task. H measures your confidence in your ability to complete it successfully.

Q: What can I do if the equation is not in my favor?

A: If $U + E + V < H$, you may find yourself procrastinating. To shift the equation in your favor, you can:

- **Change your perspective:** Reframe the task to make it seem less unpleasant or effortful.
- **Break down the task:** Divide it into smaller, more manageable chunks.
- **Focus on the value:** Remind yourself of the benefits of completing the task.
- **Set realistic expectations:** Adjust your H factor to reflect your actual capabilities.

Q: Are there any other strategies I can use?

A: In addition to the equation approach, Steel recommends:

- **The "two-minute rule":** If a task takes two minutes or less to complete, do it immediately.
- **The "Pomodoro technique":** Alternate focused work sessions (25 minutes) with short breaks (5 minutes).
- **The "eat the frog":** Tackle the most daunting task first thing in the morning.

Q: What are the benefits of overcoming procrastination?

A: Breaking the procrastination cycle can lead to:

- Increased productivity and efficiency
- Reduced stress and anxiety
- Greater sense of accomplishment and satisfaction
- Improved relationships and self-esteem

The Nature of Technology: What It Is and How It Evolves

What is technology?
