

EINSTEIN A LIFE OF GENIUS

[Download Complete File](#)

How was Einstein such a genius? His skills were built on a strong foundation of his innate mathematical ability. Einstein also made active use of a rigorous internal “sketchpad”. Fascinated by yet-unexplained phenomena, he continuously asked questions and formulated answers throughout his life.

What age did Albert Einstein become a genius? He was born in 1879, and did not really achieve any sort of widespread recognition, even within the scientific sphere, until after his 4 "miracle" papers were published in 1905. Consequently, we can conclude that "people realized Einstein was a genius" at around the age of 26.

Was Albert Einstein married? Einstein was married twice, to Mileva Maric from 1903 until 1919 and to his cousin Elsa from 1919 until her death in 1936. Previously released letters suggested that his first marriage was miserable, and that he cheated on Elsa with his secretary, Betty Neumann.

How smart was Dr Einstein? Best known for developing the theory of relativity, he is amongst the top most geniuses the world has recognized. Einstein never took an IQ score test. However, based on his historical records, academics have estimated his score to be around 160.

Did Einstein have a high IQ? Known for developing the theory of relativity, Albert Einstein is celebrated for his knowledge and contribution to Physics. History says that Einstein never took an IQ test. However, it is said that his estimated score was around 160, which is pretty high.

What made Einstein's brain so special? Einstein's brain had a much shorter lateral sulcus that was partially missing. His brain was also 15% wider than the other brains. The researchers think that these unique brain characteristics may have

allowed better connections between neurons important for math and spatial reasoning.

What were Albert Einstein's last words? If he had something very profound to say, he probably would have been conscious enough not to speak German. His last words were : want to go when I want to go. It is tasteless to prolong life artificially. I have done my share; it is time to go.

Who is the first genius? Geniuses have been around for a very long time. In fact, perhaps the oldest identifiable genius is the Egyptian Imhotep, the architect who built the Step Pyramid at Saqqara sometime before 2600 b.c.e.

How rich was Einstein? At the time of his death in 1955, it is estimated that Einstein was worth about one million U.S. dollars. However, since that time, his estate has continued to grow. Because of lucrative endorsement deals, such as for the children's 'Baby Einstein' videos, Einstein currently brings in more than \$12 million each year.

Does Albert Einstein have a child? January 6, 1903—Albert Einstein marries Mileva Mari The couple had one child, Lieserl, out of wedlock in 1902. Two years later Hans Albert was born, followed by Eduard in 1910.

Did Einstein have a PhD? Albert Einstein's career is closely linked with the city of Zurich: from 1896 to 1900 he studied physics at the Eidgenössische Polytechnikum (ETH), and in 1905 submitted his doctoral thesis to the University of Zurich. His doctorate and corresponding certificate were conferred in January 1906.

Did Albert Einstein have a friend? Cataloguing the letters from Albert Einstein to his closest friend, Michele Besso, was a roller-coaster ride: intellectually exhilarating, funny, endearing — and with an unexpected conclusion.

Who was smarter Einstein or Tesla? Tesla was a 'genius' in his own way, of course, but his intelligence was primarily of a practical nature - i.e., that of an engineer and inventor. But Einstein's intelligence was more acute and penetrating, and also more abstract, analytical and visual (in the sense of mental visualization).

Who was smarter, Einstein or Newton? Newton made contributions to many fields and his innovative math skills were arguably better than Einstein's. Albert Einstein

was a thinker and able to use physics, chemistry and math to prove his hypotheses. Again he was a major factor in the use of available technology to move further ahead.

Who is smarter, Einstein or Hawking? In terms of mathematical ability, Einstein would not come close to matching today's leading physicists like Stephen Hawking. The depth and range of his achievements are not without precedent, either. Far less well-known scientists such as Carl Gauss and Leonhard Euler made fundamental contributions in many more fields.

What was so special about Einstein? Albert Einstein is best known for his equation $E = mc^2$, which states that energy and mass (matter) are the same thing, just in different forms. He is also known for his discovery of the photoelectric effect, for which he won the Nobel Prize for Physics in 1921.

Why is Einstein the smartest person in the world? By all credible accounts, Professor Einstein was extremely intelligent. His crowning achievements, playing a key role in the inception of quantum mechanics and particularly developing the theory of general relativity, are considered to be examples of some of the greatest intellectual milestones in history.

How accurate is genius Einstein? First of all: as anyone should know this is not a documentary. Don't expect a 100% accurate description of Einstein's life or complex explanations of his theories. It's a drama and you should know this while watching it.

How to become a genius like Albert Einstein? Develop a strong imagination This is one of the most common strategies to becoming a genius. The brain can be easily trained to imagine things at all times. Einstein was known to examine little things in his life, like calculating the area of clocks in homes, and adding math to every object he saw.
