Paragraph 3:

Q: How does technology affect organizational structure?

A: Thompson argues that the type of technology used by an organization determines its structure. For example, organizations that use mass production technology tend to have a bureaucratic structure, while organizations that use a more diverse technology tend to have a more flexible structure.

Paragraph 4:

Q: How does the environment affect organizational structure?

A: The external environment can have a major impact on an organization's structure. Organizations that operate in a stable environment tend to have a more centralized structure, while organizations that operate in a turbulent environment tend to have a more decentralized structure.

Paragraph 5:

Q: How does size affect organizational structure?

A: Thompson argues that the size of an organization also affects its structure. Larger organizations tend to have a more complex and hierarchical structure than smaller organizations. They also tend to have more specialized roles and a greater division of labor.
