It will enlighten readers and expose them to the rich history of scientific thought and the complexities of the universe in which we live.

**What is Stephen Hawking's final theory?** Hawking's final theory of the Big Bang provides a bold and surprising answer. It envisages the Universe as a holographic projection. In a familiar hologram, a third dimension of space emerges from the lines and scribbles on a screen.

**What is Stephen Hawking's most famous theory?** In a landmark paper published in 1974, Hawking famously predicted that the extreme gravitational force felt at the mouths of black holes — their event horizons — would summon photons into existence in this way.

**Is there a complete theory of the universe and everything in it?** Numerous researchers concentrate their efforts on this specific step; nevertheless, no accepted theory of quantum gravity, and thus no accepted theory of everything, has emerged with observational evidence.

**Is theory of everything a hard book?** The Theory of Everything is a great book for anyone who's trying to understand more about the universe without going into too much mathematics. It's actually a compilation of various lectures by Stephen Hawking. However, at some points in the book I felt the information to be kind of disconnected and difficult to grasp.

**What is the main message of the theory of everything?** "The Theory of Everything" is a story of faith, belief, and love. It is a story about defying impossible odds, made even more inspirational in that it actually happened.

**What was Stephen Hawking's last words before he died?** Stephen Hawking's final words came in the form of a book that was completed by his family after his death, Brief Answers To The Big Questions. It includes answers to the questions that Hawking received most during his time on Earth. His final words in the book were:

"There is no God. No one directs the universe."

**What was Stephen Hawking's last warning?** In one of his final on-camera appearances, iconic physicist Stephen Hawking issued a warning to humanity about the existential threats we face and how our survival depends on colonizing another planet.

**Does Stephen Hawking believe in evolution?** There is no time, to wait for Darwinian evolution, to make us more intelligent, and better natured. But we are now entering a new phase, of what might be called, self designed evolution, in which we will be able to change and improve our DNA.

**What was Stephen Hawking's IQ when he died?** Who has a similar IQ? Stephen Hawking is known for his genius IQ. It has been estimated that he has an IQ of 160-190.

**What did Stephen Hawking predict for the future?** For decades, Hawking had been calling for humans to begin the process of permanently settling other planets. It made news headlines again and again. Hawking's rationale was that humankind would eventually fall victim to an extinction-level catastrophe - perhaps sooner rather than later.

**What did Hawking say about time travel?** According to Stephen Hawking, time travel is possible, and not just in the way we might think. Backward time travel is not supported by Hawking's theories, because new matter (a new you) would need to be created – one existing in the past and one in the present, traveling back in time.

**Why is 42 a special number?** 42 is the largest number whose reciprocal, added with three other unique positive integers, sums to exactly 1. 42 is the number of galactic years that the Sun-Earth system will survive before it's destroyed. And 42 is the expansion rate of the entire Universe, in miles-per-second-per-megaparsec.

**What is the secret of the universe 42?** The number 42 is, in The Hitchhiker's Guide to the Galaxy by Douglas Adams, the "Answer to the Ultimate Question of Life, the Universe, and Everything", calculated by an enormous supercomputer named Deep Thought over a period of 7.5 million years. Unfortunately, no one knows what the question is.

**What existed before the universe?** The initial singularity is a singularity predicted by some models of the Big Bang theory to have existed before the Big Bang. The instant immediately following the initial singularity is part of the Planck epoch, the earliest period of time in the history of our universe.
