Historically, the Nile has provided water for the cultivation of crops in Egypt that led to the burgeoning of many civilizations along the river valley.

What is the gift of the Nile lesson? Assignment #1: "Egypt is wholly the gift of the Nile," means that the Nile River made civilization in Egypt possible. It provided the people with means for transport, help with irrigation for farming, some food such as fish, and even created fertile soil for growing crops.

What is the real name of the gift of the Nile? Egypt is known as the "Gift of Nile". Most of the regions in Egypt are deserts. The only exception is the Nile basin. The Nile basin has not only witnessed the emergence of the early civilization, but it also provides water and fertile soil, which enables agriculture in the country.

Is the Nile river a gift? The Nile River has nurtured Egyptian civilization for thousands of years. Along its banks, its life-giving waters turned the surrounding

The Nile served the ancient Egyptians as an important resource for food and trade.

What does mouth of the river mean? The place where a river enters a lake, larger river, or the ocean is called its mouth.

What is the difference between a delta and a mouth? As a river flows, it picks up sediment from the river bed, eroding banks, and debris on the water. The river mouth is where much of this gravel, sand, silt, and clay—called alluvium—is deposited. When large amounts of alluvium are deposited at the mouth of a river, a delta is formed.

Why is the biggest settlement along a river often close to its mouth? Each time a river floods, silt (alluvium) is deposited on the floodplain. This makes it very fertile and good for farming and agriculture. Floodplains are often highly populated, particularly in LEDCs (i.e. developing countries), where farming employs many people.
