Why did Evinrude stop making ETEC?

Is ETEC a 2 stroke or 4 stroke? A high tech 2 stroke To maintain a sufficiently low level of pollutant emissions, the Canadian brand first developed the E-Tec generation, direct injection engines, based on its old blocks.

How does the Evinrude Etec work? The Engine Management Module is cooled by seawater provided by the water pump impeller. The EMM controls the firing of the injectors by switching the ground circuit internally. The fuel is then injected into the cylinders at as much as 600psi. Each eTec injector has its own flow coefficient file.

How much oil does a Evinrude E-TEC 60 take? IMPORTANT: The oil tank capacity is 2.0 quarts (1.9 liters).

Are Evinrude Etec good motors? If fact, the E-TEC has proven more reliable than certain other outboards. BRP was so confident in the E-TEC's reliability that the manufacturer specs state the motor needs no break-in period, and will run for 300 hours or 3 years between scheduled maintenance.

Are ETECS reliable? If we step back and take an objective look at the motor's history, reliability has been very, very good.

Are Evinrudes fast? Evinrude V8 is the world's fastest outboard EVER-176.556mph average - YouTube.

Is ETEC fuel injected?

Does ETEC have a choke? There is no choke on an etec. Put in fresh gas and turn the key.

What does ETEC mean? coli are harmless and are an important part of the digestive tract, but some can make you sick. Enterotoxigenic E. coli (ETEC) is a type of E. coli bacteria that can cause diarrhea. Anyone can become infected with ETEC.

How long do ETEC engines last? An ETEC well maintained should last 2000 hours or more. Oil is critical- XD 100. The parent company of Evinrude (BRP/Rotax) rates their two stroke piston airplane motors as having a service life of 600 hours. They rate their four stroke piston airplane motors as having a service life of up to 2000 hours.

What is the best fuel for Evinrude E-TEC? For the Evinrude E-TEC 60 HP outboard motor model year 2018, the recommended octane rating for gasoline is 87.

What is the fuel pressure for Evinrude E-TEC? System pressure should be 20 to 30 psi (138 to 207 kPa). Shut OFF outboard. Monitor pressure gauge. Pressure should not drop below 15 psi (103 kPa).

What fuel does Evinrude ETEC require? Evinrude G2 and other E-TEC's are designed to run 87 octane fuel. This includes 87 octane fuel with ethanol up to a maximum of 10%. Higher octane fuels burn slower and are usually not beneficial when an engine is designed to run on common 87 octane fuel.

What is the fuel mixture for Evinrude? What is the Fuel/Oil mixture for my (Johnson or Evinrude) motor? Please note that some Johnson and Evinrude Owners Manuals mention 100:1 mixture ratio after the motor is completely broken in, but most experts suggest against doing that. Stick with 50:1 for the 1964 and newer motors.

Which is better Evinrude or Yamaha? Both of these popular outboard brands are tough to beat. On one hand, the Evinrude has lower maintenance and will exude lower environmentally hazardous emissions. Yamahas, in comparison, are known as the most reliable motors that have been around for 30+ years.

Is Evinrude better than Mercury? The Evinrude is known for running cleanly and more efficiently. That means over time, you'll get more bang for your buck while traveling long distances. Of course, your fuel efficiency is most influenced by you, the boat owner. If you keep even speeds in waters of lower-resistance, you will use

less fuel.

Can you still get parts for ETEC? Evinrude has ceased production world wide and all the G1 and G2 engines are sold and gone. Parts for any Evinrude or ETEC engine are still available (and will continue to be) and you can buy them all online in the Sparts Parts section of the Hunts Marine website.

How many hours are Etecs good for? There are instances of E-TECs running with over 6000 hours on them. Many commercial crabbers and fisherman have over 3000 hours on their motors. Many recreational customers have well over 1000 hours on their engines.

Can you still buy e-tec outboards? Evinrude outboard dealers like ARG Marine were surprised to find out in June of 2020 that one of the biggest names in the business decided to discontinue production of Evinrude E-TEC and E-TEC G2 outboard engines.

How many hours will a 2 stroke outboard last? The old 2 stroke outboards had an expected lifetime of 1500 hours, while the modern 4 strokes are expected to have 4000 hrs. An electric motor can last for tens of thousands of hours* (with battery replacement), with a notable increase over the 4,000 hour average of high-end petrol outboards.

Is ETEC coming back? One of the world's leaders in outboard motor manufacturing will no longer exist. Evinrude motors parent company, Bombardier Recreational Products (BRP), announced last week that it would discontinue manufacturing of its Evinrude E-TEC and E-TEC G2 outboard engines.

The World's Lighthouses: From Ancient Times to 1820

By D. Alan Stevenson

Introduction:

Throughout history, lighthouses have played a vital role in maritime navigation, guiding ships safely through treacherous waters and perilous coastlines. From ancient beacons to modern engineering marvels, these structures have evolved over centuries, becoming indispensable aids to seafarers.

Ancient Origins:

The earliest known lighthouses date back to ancient Egypt and Greece. The Lighthouse of Alexandria, built around 280 BC, was considered one of the Seven Wonders of the Ancient World. It stood over 100 meters tall and emitted a powerful beam of light visible for miles. Other notable ancient lighthouses include the Pharos of Messina in Sicily and the Tower of Hercules in Spain.

Medieval Expansion:

During the Middle Ages, lighthouses became increasingly important as maritime trade expanded. Coastal communities and feudal lords established numerous small lighthouses, often using simple towers or beacons. However, these structures were typically unreliable and could not be seen from far out at sea.

Scientific Advancements:

In the 16th century, the invention of the refractor telescope led to significant improvements in lighthouse design. The use of lenses allowed for more focused and powerful beams of light, greatly increasing the range of visibility. In the 18th century,

the introduction of oil-fueled lamps further enhanced lighthouse efficiency.

The Stevenson Legacy:

The Scottish engineer Robert Stevenson made significant contributions to lighthouse design and construction in the 19th century. He developed and patented a number of innovations, including the revolving light apparatus and the use of cast iron in lighthouse construction. Stevenson's work revolutionized lighthouse engineering and established the Stevenson family as leading experts in the field.

Conclusion:

From ancient beacons to the sophisticated structures of the 19th century, lighthouses have played a critical role in maritime safety for thousands of years. The evolution of lighthouse technology, driven by scientific advancements and the ingenuity of engineers like Robert Stevenson, has transformed these structures into indispensable landmarks and symbols of maritime progress.
