What are the optical processes in semiconductor? The interaction of electrons and photons is the basis of all semiconductor optoelectronic devices. There are two kinds of events that occur when electron-photon interactions occur: (i) absorption of photons, where the electron gains energy by absorbing a photon; and (ii) emission, where the electron emits a photon...

What is an optical process? Optical Processing. An optical processor lets us analyze an image and synthesize the image with various modification by optical means. A standard optical processor consists of two equal converging lenses with focal lengths f separated by a distance $2f$.

What are the different types of optical transitions in a semiconductor? Two types of such transitions can be distinguished: (1) direct transitions where the momentum of the resulting electron-hole pair is very close to zero, and (2) indirect transitions where the resulting electron-hole pair has a finite momentum.

The New 2017 Dacia Sandero Stepway: First Impressions

Introduction

Dacia's popular budget hatchback, the Sandero, has received a significant refresh for 2017. The updated model features a more rugged exterior and a host of interior improvements. Here are some first impressions of the new Dacia Sandero Stepway.

Exterior

The most noticeable change to the 2017 Sandero Stepway is its redesigned exterior. The front end features a new grille, headlights, and bumper, giving the car a more aggressive stance. The side profile remains largely unchanged, but the rear gets a new set of taillights and a redesigned bumper. Overall, the Stepway looks more muscular and stylish than its predecessor.

Interior

Inside, the Stepway receives a number of updates, including a new dashboard, steering wheel, and seats. The dashboard is now more modern and user-friendly, with a large touchscreen display that houses the infotainment system. The steering wheel is now leather-wrapped and features audio controls. The seats are more supportive and comfortable, making long journeys less tiresome.

Engine

The 2017 Sandero Stepway is available with a choice of two petrol engines: a 0.9-liter three-cylinder and a 1.2-liter four-cylinder. Both engines are relatively fuel-efficient, with the 0.9-liter returning up to 58.9 mpg and the 1.2-liter returning up to 52.3 mpg.

Driving Impressions

On the road, the Sandero Stepway is a surprisingly capable performer. The steering is light and responsive, and the car handles well around corners. The suspension is also well-tuned, providing a comfortable ride even on rough roads. The engines provide adequate power for most driving situations, but they can feel a bit sluggish when overtaking.

Conclusion

Overall, the 2017 Dacia Sandero Stepway is a significant improvement over its predecessor. It features a more rugged exterior, a more modern interior, and a more capable driving experience. For the price, it's hard to find a better value in a new car.
