So You Want a Meade LX Telescope

The Meade LX series of telescopes are high-end, computerized GoTo models that offer exceptional performance for both visual and astrophotography applications. If you're considering purchasing one, here are some questions and answers to help you make an informed decision:

Q: Which LX model should I choose?

A: The LX200, LX600, and LX850 models are all excellent choices. The LX200 is the most compact and affordable, while the LX600 offers a larger aperture and higher magnification. The LX850 is the most powerful and versatile model, with a large aperture, high magnification, and advanced features for astrophotography.

Q: How do I use the LX telescope's GoTo system?

A: The GoTo system uses GPS and computerized star charts to automatically locate and track celestial objects. To use it, simply enter the object's coordinates or select it from the database, and the telescope will move to it automatically.

Q: What accessories do I need?

A: Essential accessories include eyepieces, a telescope case, and a power supply. You may also want to consider a StarSense autoguider for astrophotography, a moon filter, and a dew shield.

Q: How do I maintain my LX telescope?

A: Regular maintenance is crucial for optimal performance. Clean the optics regularly, lubricate the gears, and check the alignment periodically. Store the telescope in a dry, dust-free environment when not in use.

Q: Where can I find support and information?

A: Meade provides excellent customer support and documentation. There are also numerous online resources, including forums and user groups, where you can connect with other LX telescope owners and learn from their experiences.
