Who published the first modern anatomy book in the 1500's? Compiling his research, Vesalius published an anatomy work titled *De humani corporis fabrica libri septem* ("On the fabric of the human body in seven books"). The *Fabrica* included illustrations of male and female anatomy.

Vesalius, regarded as the founder of modern anatomy, authored the book *De humani corporis fabrica*, which contained many illustrations of the skeleton and other body parts, correcting some theories dating from Galen, such as the lower jaw being a single bone instead of two.
