Is JavaServer Faces still used? Absolutely, yes as long as you know its strengths and weaknesses. JSF is a powerful component-based MVC framework, it offers you a lot of facilities to rapid development. Strengths: A set of built-in components and facilities to create new one through composite components or traditional component development.

What is JavaServer Faces vs spring? In summary, Spring MVC follows the MVC architectural pattern, and provides flexibility, scalability, and easier testing, while JSF follows a component-based architecture, has a steeper learning curve, and limited testing capabilities.

What are JavaServer Faces in Java? JavaServer Faces (JSF) is a new standard Java framework for building Web applications. It simplifies development by providing a component-centric approach to developing Java Web user interfaces. JavaServer Faces also appeals to a diverse audience of Java/Web developers.

What is the difference between JSP and JSF? Java Server Pages (JSP) is a server-side programming technology that allows the creation of a dynamic, platform-

independent method for developing Web-based applications. Java Server Faces (JSF) is a Java-based web application framework proposed to simplify web-based user interfaces' development integration.

Is JSF still used in 2024? JSF is another reliable framework, especially for building component-based user interfaces. I appreciate its integration with Java EE and how it handles the complexities of managing UI components. If you're developing enterprise-level applications, JSF is worth considering.

Why is JSF not popular? 1. Quick development is cheap development, while JSF makes straightforward tasks difficult. 2. It's relatively difficult to learn, so it's hard to extend the team if there's a need to do so quickly.

What is better than JSF? Spring MVC makes it much more easier to convert static htmls for Spring MVC views than to transfer them to JSF UI components. This makes life easy for developers and definitely a good benefit for Spring over JSF.

What is the purpose of JSF? JSF stands for JavaServer Faces. It is a Java-based web application framework that was designed to simplify the development of user interfaces (UI) for Java web applications. It is a component-based framework that enables developers to create reusable UI components, manage component state, and handle events.

What is the difference between HTML5 and JSF? In Summary, HTML5 is a client-side markup language that provides a basic set of tags for web page structure, while JSF is a Java-based server-side framework that offers a rich set of UI components, event handling, data binding, and platform-specific capabilities for building Java web applications.

Is JSF front-end or backend? JSF is a server-side framework for building the front end of Java-based web applications. Angular is a client-side framework by default for building user interfaces of web applications with any backend including Java.

What is the difference between JavaFX and JSF? Component Model: JavaFX uses a scene graph-based model where components are organized in a hierarchical structure. This allows for more flexible layout arrangements and complex visual effects. In contrast, JSF uses a component tree model where components are

organized in a tree-like structure.

What is the JSF life cycle? The lifecycle of a JavaServer Faces application begins when the client makes an HTTP request for a page and ends when the server responds with the page, translated to HTML. The lifecycle can be divided into two main phases: Execute and Render.

Why JSP is not used anymore? The common argument is that JSP leads to messy, undisciplined code. It is difficult for cross-functional teams to work with. For example, front-end developers and designers typically don't know Java and they would have to learn a new language.

What replaced JSF? AngularJS, Spring MVC, Spring, Vaadin, and HTML5 are the most popular alternatives and competitors to JSF.

What replaced JSP? JSP, on the other hand, is replaced by separate client-side modules written in Angular, React or Vue. UI & Server side logic which was clubbed into one codebase, initially, is now split into separate codebases.

Is Java struts still used? Although Struts 2 is still in use today, it is considered a legacy framework. Spring has largely taken over as the framework of choice due to its fast performance, lightweight nature, and greater flexibility.

What replaced JSF? AngularJS, Spring MVC, Spring, Vaadin, and HTML5 are the most popular alternatives and competitors to JSF.

Is the Apache Wicket still used? Wicket is an open source, component oriented, serverside, Java web application framework. With a history of over a decade, it is still going strong and has a solid future ahead.

Are JSP still used? Are JSP and servlets still used? Servlets are still used as the basis for web frameworks. JSP (JavaServer Pages) and servlets are still widely used in web development, especially in Java-based web applications.

Social Psychology: David Myers 11th Edition Q&A

Question 1: Define social psychology and its primary goals.

Answer: Social psychology studies the influence of others on our thoughts, feelings, and behaviors. Its primary goals are to understand the causes and consequences of social behavior, and to apply this knowledge to improve social interactions and well-being.

Question 2: Explain the importance of the scientific method in social psychology.

Answer: The scientific method allows researchers to systematically collect, analyze, and interpret data to test hypotheses and draw conclusions. It helps ensure that findings are reliable, valid, and unbiased.

Question 3: Describe three major perspectives in social psychology: sociocultural, cognitive, and evolutionary.

Answer: The sociocultural perspective emphasizes the influence of social and cultural factors on behavior. The cognitive perspective focuses on the role of mental processes in shaping social interactions. The evolutionary perspective examines how our social behaviors have been influenced by natural selection over time.

Question 4: Discuss the concept of the fundamental attribution error and its implications.

Answer: The fundamental attribution error occurs when we overestimate the influence of internal factors (e.g., personality) and underestimate the influence of external factors (e.g., situational constraints) on others' behavior. This can lead to biased judgments and misunderstandings.

Question 5: Explain the role of social norms in shaping our behavior.

Answer: Social norms are unwritten rules that guide our behavior in specific social situations. They influence what we do and say, and they can shape our attitudes and beliefs. Conforming to social norms can lead to acceptance and approval, while violating them can result in negative consequences.
