The International Cosmetic Ingredient Dictionary and Its Role in Cosmetic Safety

What is the International Cosmetic Ingredient Dictionary and Handbook (INCI)?

INCI is a global standard that provides a uniform classification and nomenclature for cosmetic ingredients. It is developed and maintained by the Personal Care Products Council (PCPC) and the European Cosmetic, Toiletry and Perfumery Association (Cosmetics Europe). INCI assigns each cosmetic ingredient a unique name that identifies its chemical composition and function.

Why is INCI Important?

INCI serves several vital purposes:

- **Standardization:** It ensures that cosmetic ingredients are labeled consistently across the world, facilitating communication among manufacturers, regulators, and consumers.
- **Consumer Safety:** By providing standardized ingredient names, INCI helps consumers identify potential allergens or irritants. It also enables dermatologists and other healthcare professionals to accurately assess the safety of cosmetic products.
- **Regulatory Compliance:** INCI is recognized by regulatory agencies worldwide and is used to ensure compliance with cosmetic labeling requirements.

How is INCI Used?

INCI must be listed on all cosmetic product labels. The ingredient names should be printed in descending order of concentration. This allows consumers to identify the primary ingredients used in a product and make informed choices based on their individual preferences and sensitivities.

What are Some Common Cosmetic Ingredients Listed in INCI?

Some of the most common cosmetic ingredients listed in INCI include:

- Aqua (Water)
- Glycerin
- Stearyl Alcohol
- Cetearyl Alcohol
- Hydrogenated Polydecene

Where Can I Find More Information about INCI?

The PCPC and Cosmetics Europe websites provide extensive information about INCI, including the latest updates and guidance documents. Additionally, many online cosmetic ingredient databases allow users to search for ingredients and obtain detailed information about their uses and safety profiles.
