**Who won the case of the Wright brothers vs Curtiss?** The broad protection intended by this patent succeeded when the Wrights won patent infringement lawsuits against Glenn Curtiss and other early aviators who used ailerons to emulate lateral control described in the patent and demonstrated by the Wrights in their 1908 public flights.

**Which country invented wireless communication?** The following year, on June 2, 1896, Marconi took out a patent on his invention of the “wireless telegraph by means of electric impulses” in England; a year later he was able to establish a wireless telegraphic connection with a range of 15 kilometers across the Bristol Channel.

**What is wireless communication services?** Wireless communications is the transmission of voice and data without cable or wires. In place of a physical connection, data travels through electromagnetic signals broadcast from sending facilities to intermediate and end-user devices.

**Who is the real father of wireless communication?** Guglielmo Giovanni Maria Marconi, 1st Marquis of Marconi FRSA GCVO (Italian: [ɡuʎiˈlmo marˈkoːni]; 25 April 1874 – 20 July 1937) was an Italian inventor, electrical engineer, and politician, known for his creation of a practical radio wave-based wireless telegraph system.

**Which country invented WiFi?** Wi-fi has been recognised internationally as one of Australia's greatest scientific achievements. O'Sullivan and his team ... ushered in the age of high-speed, always-on wireless connectivity we enjoy today.

**Is wireless communication a technology?** Wireless communication (or just wireless, when the context allows) is the transfer of information (telecommunication) between two or more points without the use of an electrical conductor, optical fiber or other continuous guided medium for the transfer. The most common wireless technologies use radio waves.

**What is the difference between Wi-Fi and wireless communication?** Wi-Fi is a wireless connection created from a wired network using a wireless router or access point. Wi-Fi can provide wireless connectivity for multiple types of internet service, such as DSL, satellite internet, and fiber optics. Wireless Internet, on the other hand, is another name for Cellular Wireless.

**What are the three types of wireless communications?**

**Who is the father of 5G?** “The millimetre wave that J C Bose worked on is the backbone of developing 5G. Marconi and Russian scientists Alexander Stepanovich Popov, who were also conducting similar experiments, were working with much

lower frequencies. In fact, the technology that Marconi used was developed by Bose.”

**Who is the pioneer of wireless communication?** Guglielmo Marconi: The pioneer of wireless communications | IEEE Conference Publication | IEEE Xplore.

**Who is the inventor of wireless network?** Vic Hayes has been called the "father of Wi-Fi" because he chaired the IEEE committee that created the 802.11 standards in 1997. Before the public even heard of Wi-Fi, Hayes established the standards that would make Wi-Fi feasible. The 802.11 standard was established in 1997.

**Who owns WiFi?** The Wi-Fi Alliance is a non-profit organization that owns the Wi-Fi trademark.

**Who actually made WiFi?** That's why Bluetooth, WiFi and other essential technologies are based, at their core, on an idea dreamed up by Hedy Lamarr and George Antheil.

**What country is WiFi from?** Australia unveiled WiFi technology spearheaded by Dr. John O' Sullivan. The concept was first conceived in the 1970s while working with a team of engineers.

**Who invented the first wireless network?** Vic Hayes has been called the "father of Wi-Fi" because he chaired the IEEE committee that created the 802.11 standards in 1997. Before the public even heard of Wi-Fi, Hayes established the standards that would make Wi-Fi feasible. The 802.11 standard was established in 1997.

**Who invented world wireless system?** The World Wireless System was a turn of the 20th century proposed telecommunications and electrical power delivery system designed by inventor Nikola Tesla based on his theories of using Earth and its atmosphere as electrical conductors.

**Which country invented communication?** Communication in Ancient Times The first means of communication was, of course, the human voice but about 3,200 BC writing was invented in Iraq and Egypt. It was invented about 1,500 BC in China. Other civilizations in Central America like the Mayans also invented systems of writing.

**Who invented wireless message?** Italian physicist and inventor Guglielmo Marconi demonstrating the wireless radio device, which was used to transmit Morse Code over the Atlantic Ocean from 1901; excerpt from a newsreel.

**How did Serafina view Lyra's destiny?** Serafina says that they all have to act like they're not at the mercy of destiny in order to feel meaningful, and explains that Lyra is destined to put an end to destiny—but only if she feels as though she's not following destiny as she does so.

**What happens in chapter 15 of Northern Lights?** In the present day July, Mattie creeps down the front stairs of the hotel at midnight to avoid waking Cook. She's making her way to the cellar to burn Grace Brown's letters but finds the cellar door locked.

**What happens in chapter 4 Northern Lights?** In this episode we chat about Chapter 4 of Northern Lights - The Alethiometer. In this chapter, Lyra meets Mrs Coulter and becomes immediately obsessed with her. The master tells Lyra it's time for her to leave Jordan college, so she goes to live with Mrs Coulter, who she's known for literally a day?!

**What happened in Chapter 3 of the Northern Lights?** Mattie and her best friend Weaver are picking fiddleheads (very young ferns) to sell to a chef at a hotel. She asks Weaver to choose a word, and their friend Minnie, who is pregnant, grumbles in the background. Weaver chooses the word iniquitous and he and Mattie pretend to duel, using their fingers as guns.

**Why is Lyra the second Eve?** The witches' prophecy states that this girl will be able to pick the "correct" cloud-pine branch out of several, as indeed Lyra does. It transpires that Lyra's destiny is to be the second Eve and fall into the temptation of the serpent, represented by Mary Malone.

**What did Lord Faa tell Lyra after the roping?** John Faa tells Lyra that she is really the illegitimate daughter of Lord Asriel and Mrs. Coulter and that Ma Costa nursed her as a baby. Not long after the Roping, an injured Gyptian spy returns from a reconnaissance mission.

**Who is the bad guy in the Northern Lights?** Marisa Coulter (née Delamare), known simply as Mrs. Coulter, is a character in Philip Pullman's His Dark Materials trilogy and one of the main antagonists of Northern Lights: the former lover of Lord Asriel and biological mother of Lyra Belacqua.

**Why does Lyra run away from Mrs. Coulter?** Lyra later heard about Lord Asriel's imprisonment on Svalbard from Carlo Boreal and realised that Mrs Coulter had deceived her, running away during the party after connecting the Oblation Board and what Lyra had come to know as the urban myth of the 'Gobblers'.

**What happened to Roger's dæmon?** After his rescue from the General Oblation Board at Bolvangar, Roger and his dæmon Salcilia were killed by the intercision process used by Lord Asriel to open the Svalbard window to Cittàgazze.

**What happens at the end of Northern Lights?** Iorek removes the human conventions that Iofur had been enforcing and becomes King once again, giving Lyra the name 'Silvertongue' for her capacity for lying. In the last section of the story, Iorek takes Lyra and Roger to where the Bears had been keeping the exiled Lord Asriel.

**What is Mrs. Coulter's motivation?** Mrs. Coulter enjoys performing cruel experiments on other children but she devotes herself to protecting her own child, Lyra, from these same experiments.

**Who let the fire go out in chapter 4?** As Chapter 4 continues, Jack obsesses over the pig and tells the hunters that they will need to paint their faces as camouflage so the pigs can not see them coming. They leave the signal fire unattended as they go off hunting, and it goes out.

**What happens in chapter 2 of Northern Lights?** A fight breaks out between Lou and Beth, there's literally some crying over spilled milk, and Mattie misses her mother, who died that past winter. Abby, age fourteen, enters carrying eggs and tells the girls that Pa will be home soon.

**What happened in Chapter 13 light in the Forest?** Summary and Analysis Chapter 13 During the summer, they camp in a quiet glade and trap fish, swim, relax, and enjoy their journey. At the Forks of the Muskingum River, True Son rejoices that

he's near home. When he finally reaches his Indian home, Cuyloga welcomes his son.

**What happened in Chapter 7 of the light in the forest?** In a scornful tone True Son asks Uncle Wilse if Wilse is the brother of David Owens, a white man who killed his Indian wife and children for scalp money. In response to this Uncle Wilse violently slaps True Son in the face.

**Did Lyra and Will sleep together?** Lyra has sexual feelings, but they are described in a tame way. However, the descriptions of her sexual feelings were censored in American versions, so you may want to read the British edition (it is really not inappropriate). Some people complain that Will and Lyra have sex. They do not!

**Who does Lyra fall in love with?** The book ends with Will and Lyra falling in love but realising they cannot live together in the same world, because all windows – except one from the underworld to the world of the Mulefa – must be closed to prevent the loss of Dust, because with every window opening, a Spectre would be created and that means Will must ...

**Who put Lyra to sleep?** Twelve-year old Lyra is in a drug-induced sleep. Her mother, Mrs. Coulter, claims she's put her in this unconscious state to keep her safe from the Church. Meanwhile, three groups: the Church, the rebels headed by Lyra's father, Lord Asriel, and Lyra's friend Will search for her.

**What happens to Lyra in the end?** "They kept their promise to each other, going on to live full lives in their own worlds. "Will became a medical student and later, a successful surgeon. "Lyra went on to be educated at St Sophia's College in Oxford, where she was taught how to once again read the alethiometer..."

**What was the choice Lyra had to make?** Because Lyra's destiny is to put an end to all destiny, her choice to express physically her love for Will restores Dust to the world and ensures that the Church will be defeated. After Lyra's decision, everyone will have the right to mature and make independent decisions without fearing the censure of the Church.

**Why did the harpy save Lyra?** The harpy Lyra named "Gracious Wings" had saved her from falling into the abyss because of the memories Lyra had shared about her

childhood with Roger and travels with Lee and Iorek. It wanted to hear more.

**Why can't you whistle at the Northern Lights?** The appearance of the Northern Lights was a bad omen. Thought to be the souls of the dead, the Sámi believed you shouldn't talk about the Northern Lights. It was also dangerous to tease them by waving, whistling, or singing under them, as this would alert the lights to your presence.

**What did Kristian Birkeland do?** Norwegian professor Kristian Birkeland (1867–1917) was the very first scientist in the world to realize that the northern lights had something to do with the electromagnetic storms from the sun. He was also the man behind the fantastic invention that enabled the making of fertilizer by harvesting nitrogen from the air.

**Will there be a season 2 of Northern Lights?** Watch Northern Lights, Season 2 | Prime Video.

**What does Serafina tell Lee about fate and free will?** Scoresby and Serafina wander into a conversation about fate and free will. Scoresby is on the side of free will, saying "a man should have a choice whether to take up arms or not" (18.10). Serafina is more on the side of fate, arguing that "we have no more choice in that than in whether or not to be born" (18.11).

**Why does the Magisterium think Lyra is Eve?** As it is in the books, Lyra becomes His Dark Materials' biblical re-imagination of "Eve." Like the biblical character Eve, Lyra will be tempted to do as the serpent tells her, causing mankind's fall -- or at least that's what the Magisterium and Mrs. Coulter think.

**Is Lyra's mother good or bad?** Coulter. Mrs. Coulter, Lyra's mother, is an almost purely evil character.

**What does Lyra represent in His Dark Materials?** Lyra, the protagonist of the trilogy, is the second Eve. To Pullman, the original Eve depicted in Genesis was not the cause of all sin, but the source of all knowledge and awareness.

**What happened to Serafina?** Serafina was badly injured in her panther form. With his power to cure animals, Braeden was able to heal her. But when Serafina shifted back into human form, there was nothing he could do to save her. He took her body

to the old cemetery and buried her until he could figure out a way to put her back together.

**What was the choice Lyra had to make?** Because Lyra's destiny is to put an end to all destiny, her choice to express physically her love for Will restores Dust to the world and ensures that the Church will be defeated. After Lyra's decision, everyone will have the right to mature and make independent decisions without fearing the censure of the Church.

**What is Lyra's betrayal?** Therefore her betrayal is only Roger, who she kills. ~~ The book makes it quite clear that leaving Pan when she enters the world of the dead is the "betrayal" which is referred to. This is the only time she knowingly and voluntarily betrays anyone, and it's a betrayal of her own external soul.

**What happens when Lyra and Will kiss?** The two realise that they must return to their worlds, and that the only portal that can be allowed to remain is the one in the Land of the Dead, which the deceased need to help them pass on. The two confess their love for each other and kiss, creating a storm of Dust and fulfilling the prophecy about Lyra.

**What does Lyra reveal to Lord Asriel that she knows about him?** When they arrive, Lord Asriel panics until he sees Roger. Lyra tells Lord Asriel she knows he is her father.

**Why can't Lyra read the alethiometer?** Lyra can no longer read the alethiometer because she is no longer in the childlike state of grace in which she existed before she fell in love with Will.

**Why can Mrs Coulter control the spectres?** In the TV adaptation, Wilson's Coulter tells Boreal (Ariyon Bakare) that she's able to resist and control the Spectres thanks to her own powers of self-control, implied to be the same process she uses to separate from her daemon. "They consume what makes us human, so I just hid that from them," she says.

**Why is Mrs Coulter's daemon mute?** Coulter's golden monkey, on the other hand, has never once spoken in *His Dark Materials*, likely due to how emotionally repressed she is. The golden monkey is an extension of Mrs. Coulter's emotions, and given

how she rarely expresses her feelings truthfully, her daemon never talks.

**Why does Mrs Coulter hate her daemon?** So why is this? Well essentially, it is representative of some of the inner conflict Mrs Coulter herself is feeling – remember, the daemon is merely an extension of her own self, so any anger expressed towards it is basically anger at herself.

**Did Lyra and Will sleep together?** Lyra has sexual feelings, but they are described in a tame way. However, the descriptions of her sexual feelings were censored in American versions, so you may want to read the British edition (it is really not inappropriate). Some people complain that Will and Lyra have sex. They do not!

**Why can't Will and Lyra live in the same world?** The book ends with Will and Lyra falling in love but realising they cannot live together in the same world, because all windows – except one from the underworld to the world of the Mulefa – must be closed to prevent the loss of Dust, because with every window opening, a Spectre would be created and that means Will must ...

**What is the deeper meaning of His Dark Materials?** His Dark Materials isn't about killing a bad guy, it's about banishing corruption and overthrowing a dangerous ideology. Let's all start rereading, while we wait to see what The Book of Dust might have to teach us.
