**Questions and Answers on Solution of Mechanics of Materials by Beer 5th Edition**

**Q1. Determine the normal stress in the bar shown in Fig. 2.24.**

**A1:** The normal stress in the bar is given by:

$$\sigma = P/A = 100 \text{ kN} / 100 \text{ mm}^2 = 1 \text{ MPa}$$

**Q2. Calculate the shear stress in a circular shaft subjected to a torque of 500 N-m and has a diameter of 50 mm.**

**A2:** The shear stress in the shaft is given by:

$$\tau = T / (\pi d^3/16) = 500 \text{ N-m} / [\pi(0.05 \text{ m})^3/16] = 40.6 \text{ MPa}$$

**Q3. Determine the bending stress in a beam subjected to a concentrated load of 2000 N at its mid-span, with a length of 2 m and a rectangular cross-section of width 50 mm and height 100 mm.**

**A3:** The bending stress in the beam is given by:

$$\sigma = (Mc) / I = [(2000 \text{ N})(1 \text{ m})] / (50 \text{ mm} \times 100 \text{ mm}^2 / 12) = 16.67 \text{ MPa (tensile)}$$

**Q4. Calculate the deflection of a cantilever beam with a length of 1 m, a cross-sectional area of 50 mm x 100 mm, and an elastic modulus of 200 GPa, subjected to a concentrated load of 1000 N at its free end.**

**A4:** The deflection of the beam is given by:

$$\delta = (PL^3) / (3EI) = [(1000 \text{ N})(1 \text{ m})^3] / [3(200 \text{ GPa})(50 \text{ mm} \times 100 \text{ mm}^2)] = 0.00167 \text{ m} = 1.67 \text{ mm}$$

**Q5. Determine the critical buckling load of a column with a length of 2 m, a cross-sectional area of 100 mm x 100 mm, and an elastic modulus of 200 GPa.**

**A5:** The critical buckling load is given by:

$$P_{cr} = (\pi^2 EI) / L^2 = [(\pi^2)(200 \text{ GPa})(100 \text{ mm} \times 100 \text{ mm}^2)] / (2 \text{ m})^2 = 15.71 \text{ kN}$$

**What is the hardest surgery for an orthopedic surgeon?**

**How many do match into orthopedics?** Results: During the analyzed study period of 2019 to 2023, there were 3,473 (74.5%) allopathic students and 571 (59.9%) osteopathic students who successfully matched into orthopaedic surgery. This match rate for allopathic students was 74.5% compared with 59.9% for osteopathic students.

**How hard is it to match into orthopedic surgery as a do?** Osteopathic (DO) Students Matching into Orthopaedic Surgery The total number of DO Senior Applicants was 197. Of those, 111 matched, for a 56.35% match percentage. This makes orthopaedic surgery a Not Friendly field for osteopathic students.

**What is the difference between orthopaedic surgery and orthopedic surgery?** These are simply two alternate, and correct, spellings for the same branch of medicine. While orthopedic is the more commonly used and accepted spelling, especially in American english, orthopaedic is the more traditional academic and British spelling.

**What is the riskiest surgery ever?**

**What is rule of 3 in orthopedics?** During orthopaedic management of the various conditions, the number “3” and its multiples occur quite often. For example, primary fibrous callus is believed to start consolidating at the third week postfracture<sup>1-3</sup>. Fractures that are amenable to nonsurgical treatment are traditionally immobilized for 3 to 6 weeks.

**Is Ortho becoming less competitive?** Orthopaedic surgery has always been a popular and competitive field, but in 2022, approximately 40% of applicants for orthopaedic surgery residency positions did not successfully match, despite their immense talent and commitment.

**How many surgeries does an orthopedic surgeon DO a day?** Some surgeries, such as an arthroscopy, may only take a surgeon 30-45 minutes, allowing them to treat more patients in a day. However, many orthopedic surgeries can take multiple hours, which means a surgeon may only book one or two a day.

**What type of orthopedic surgeon gets paid the most?**

**What is the hardest year of ortho residency?** When he started on the ortho rotations, he definitely had longer days. Easily up to 12 hours.” The second year is the hardest year for orthopedic residency. All of the responsibility.

**What is the most competitive ortho subspecialty?** Because orthopaedic trauma has been the most competitive subspecialty for matching into a fellowship position over the past decade, the importance of a high-quality fellowship application is further emphasized.

**What is the hardest orthopedic surgery to recover from?**

**Who is the best orthopedic surgeon in the world?**

**Who is the father of orthopaedics?** About Nicholas Andry (Lyon 1658 – Paris 1742): Father of Orthopaedics. Nicholas Andry holds an important place in the history of orthopaedics and medicine as it was Andry who first used the word

“orthopaedics” in a book published in 1741.
