

Basic immunology functions and disorders of the immune system 5e

[Download Complete File](#)

What is the basic concept of immunology? Immunology is the study of the immune system and is a very important branch of the medical and biological sciences. The immune system protects us from infection through various lines of defence. If the immune system is not functioning as it should, it can result in disease, such as autoimmunity, allergy and cancer.

What are the three main types of immunological disorders?

What are the 3 major functions of the immune system?
