**What does service overdue mean on a BMW?** Service Vehicle: When your vehicle needs servicing, a yellow symbol will show. If your BMW vehicle service is overdue, it will turn red. Light Bulb: One or more external light is out or has an issue. If you replace the bulb and the symbol does not turn off, then a service appointment is necessary.

**How to get rid of BMW service light?** Press and hold the small odometer button near the bottom left corner of the instrument panel until the service message appears. Release the button, and press and hold it again until the message says "Reset?". Release the button again, and press and hold it. The message will say, "Reset in Progress".

**Why are BMW oil changes so expensive?** BMW oil changes tend to be pricier than those for other brands due to several factors. The high-quality synthetic oil used in BMWs, advanced engineering, and specialized tools and equipment contribute to the higher cost. Additionally, the maintenance required for BMWs ensures optimal performance and longevity.

**How long does E90 last?** 200,000 - 250,000 miles is a more realistic target (up to the E90 chassis at least - I can't speak for the turbo'd F3X's). Being your car is in Cali, the lack of the ill effects of corrosion will probably even extend that target if you want. It all depends on your tolerance for repair and maintenance costs.

**How long can a BMW go without an oil change?** BMW Oil Change BMWs are special vehicles and the newest models are engineered to use synthetic oils and fluids that require less changing than traditional oils. They're designed to last up to 12,000 and even 15,000 miles, roughly one driving year, between oil change

intervals.
