When the Moon Split: An Exegesis by Safiur Rahman Mubarakpuri

Question: Did the moon physically split in half during the time of the Prophet Muhammad (PBUH)?

Answer: According to Safiur Rahman Mubarakpuri, a renowned Islamic scholar and author of "The Sealed Nectar", the answer is yes. Mubarakpuri, citing numerous early Islamic sources including the Quran, Hadith, and the historical works of Ibn Hisham and Ibn Ishaq, presents compelling evidence to support the occurrence of the moon's splitting.

Question: What is the Quranic basis for the moon's splitting?

Answer: The Quran mentions the moon's splitting in Surah Al-Qamar (The Moon), verse 1: "The Hour has drawn near, and the moon has split." Mubarakpuri explains that this verse clearly indicates the literal splitting of the moon, not a metaphorical or figurative event.

Question: How did the witnesses describe the event?

Answer: Mubarakpuri quotes various eyewitness accounts from the time of the Prophet Muhammad (PBUH), including those of Abu Talib, Abu Bakr, and Anas bin Malik. These witnesses described seeing the moon split into two halves, which moved apart and then came back together.

Question: What is the historical significance of the moon's splitting?

Answer: Mubarakpuri emphasizes the importance of the moon's splitting as a miracle that confirmed the Prophethood of Muhammad (PBUH). It also challenged the pagan beliefs of the Quraish, who claimed that the moon was an idol.

Question: Does modern science support the moon's splitting?

Answer: Mubarakpuri discusses theories proposed by some geologists and astronomers to explain the possible causes of the moon's splitting, such as a volcanic eruption, an earthquake, or a meteorite impact. However, he concludes that while these theories may offer plausible explanations, the ultimate cause of the moon's splitting remains a mystery known only to Allah.
