**What is the price of issues in Pakistan economy by Akbar Zaidi?** Rs 595.00.  
“Issues in Pakistan's Economy” by S. Akbar Zaidi was first published in 1999.

**What are the key issues of Pakistan economy?** Critical constraints, including persistent fiscal and current account deficits, protectionist trade policies, unproductive agriculture, a difficult business environment, a heavy state presence in the economy, and a financially unsustainable energy sector, have remained unaddressed, leading to slow and volatile growth.

**What caused Pakistan's economic crisis?** Pakistan has experienced an economic crisis as part of the 2022 political unrest. It has caused severe economic challenges for months due to which food, gas and oil prices have risen. The Russian invasion of Ukraine has caused fuel prices to rise worldwide.

**What is the current situation of the Pakistan economy?**

**What are the economic risks in Pakistan?** Growth undermined by inflation and insecurity The economy shrank slightly in 2023, penalised by galloping inflation triggered by extensive flooding in the Indus Valley at the end of 2022 that destroyed much of the region's farmland, and the war in Ukraine, which pushed up food prices.

**How can Pakistan's economy be improved?** Levelling the playing field, improving the business environment, and allowing the private sector to have more space internally and also on the export side will help Pakistan. Those are the key pillars that Pakistan would need in order to improve its situation and the Fund is ready to support," Azour said.

**Why is Pakistan unable to sustain its economy?** An unsustainable external debt servicing burden Yet excessive reliance on external partners to sustain growth has led the country into a debt trap. According to data shared by the State Bank of Pakistan, as of January 2024, Pakistan's external debt servicing burden for the next 12 months equals almost \$29 billion.

**What are the causes of low economic growth in Pakistan?** The increasing burden of huge foreign loans impeded the economic growth prospects of Pakistan. Lack of Political Stability: The lack of political stability demanded huge public expenditure for maintaining law and order in the country. This huge public expenditure acted as a drain on the country's economic resources.

**What makes up Pakistan's economy?** In 2021, services accounted for 58% of overall GDP, manufacturing 12%, other industrial activity 7%, and agriculture 23%.
