

# CHAPTER13 PRIMARY SOURCE POLITICAL CARTOON

## [Download Complete File](#)

**Can a political cartoon be a primary source?** A primary source is any original source - an image, text, newspaper article, political cartoon, map, deed, letter, diary, or artifact; and the list goes on - that comments on, testifies, or bears witness to the time period of its own production. In this respect, primary sources are the raw material of history.

**What is the primary topic of the political cartoon?** Their subject matter is usually that of current and newsworthy political issues, and, in order for them to be understood, they require that readers possess some basic background knowledge about their subject matter, ideally that provided by the medium in which they are published.

**What is the source of political cartoons?** Developed in England in the latter part of the 18th century, the political cartoon was pioneered by James Gillray, although his and others in the flourishing English industry were sold as individual prints in print shops.

**Is editorial cartoon a primary or secondary source?** Answer and Explanation: For most cases, no, an editorial cartoon is not a primary source. Editorial cartoons are usually not primary sources for research because they are opinions or interpretations of current events and topics. The artist rarely has firsthand knowledge of the events.

**How to write a source analysis for a political cartoon?**

**What are 2 elements of a political cartoon?** symbolism – using an object to stand for an idea. captioning & labels – used for clarity and emphasis. analogy – a

comparison between two unlike things that share some characteristics. irony – the difference between the way things are & the way things are expected to be.

**How to analyse a political cartoon?** Usually, the point is to highlight something about the character of a person. For example, if a person is drawn with a large, toothy grin, it can be a sign that they have evil intentions and are untrustworthy. Therefore, when interpreting a cartoon, look for any physical features that seem obviously exaggerated.

**What are the criteria for a political cartoon?** Through the use of analogy, irony, symbolism, and exaggeration the cartoonist expresses the themes and problems of their historical era. Political cartoons express opinions about public issues and public individuals. They appeal to all levels of readers.

**How to create a political cartoon?**

**Are political cartoons good sources of history?** Political cartoons are vivid primary sources that offer intriguing and entertaining insights into the public mood, the underlying cultural assumptions of an age, and attitudes toward key events or trends of the times.

**What is the purpose of the political cartoon?** Political cartoons allow readers to understand complex political issues through illustrations with or without captions. They are used to make readers laugh about complex current political issues through illustrations.

**What is the most famous political cartoon?** Gillray's most famous cartoon, The Plumb-Pudding in Danger, was described by modern British political cartoonist Martin Rowson as “probably the most famous political cartoon of all time.”

**What is a primary source and examples?** “A primary source gives the words of the witnesses or the first recorders of an event. Primary sources include manuscripts, archives, letters, diaries, and speeches. ... Secondary sources are 'descriptions of the event derived from and based on primary sources'.

**What is primary source and secondary source?** Primary sources function as the main object of analysis in a research study, whereas secondary resources are used to describe, interpret, generalize, or synthesize primary sources. Secondary sources

help readers understand second-hand information and commentary and can detail how and why a historical event occurred.

**Is an editorial a primary source?** An editorial article is not a primary source because it is an interpretation of an event or issue rather than a recounting of events from a firsthand perspective. Editorial articles often discuss details of events gleaned from primary sources, but the interpretation means that they are secondary sources.

**Are political cartoons a primary source?** Political cartoons can be tricky because they can be considered either primary or secondary. Articles, books, or other documents discussing research that was not conducted by the writer(s) are secondary sources in the sciences. OPVL is an effective tool to analyze primary and secondary source documents.

**How do you cite a political cartoon?**

**What are the 5 techniques used in political cartoons?** Students learn to spot five techniques of political cartoons: symbolism, exaggeration, labeling, analogy and irony, to examine what the cartoonist's message means to them.

**What is the best way to analyze political cartoons?** Identify areas of exaggeration or caricature. Then, ask yourself why the artist might have made that decision. Many political cartoonists will include caricatures of well-known politicians, which means they'll exaggerate their features or bodies for humor, easy identification, or to emphasize a point.

**What are 3 symbols you see in the political cartoon?** Death – vulture, skeleton with shroud, skull and crossbones, grim reaper. Donkey- Democratic party, can also symbolize unintelligence, not as majestic as a horse. Elephant – Republicans. Jester- mockery • Love – heart, Cupid • Money – dollar bill or dollar sign.

**How to analyze a political cartoon video?**

**Is political analysis a primary or secondary source?** Examples of Secondary Sources: Textbooks, edited works, books and articles that interpret or review research works, histories, biographies, literary criticism and interpretation, reviews of law and legislation, political analyses and commentaries.

**What are political cartoons considered?** Political cartoons (also known as editorial cartoons) are defined as illustrations or comic strips containing a political or social message that usually relates to current events or personalities.

**Can a fictional movie be a primary source?** A fictional movie is usually a primary source. A documentary can be either primary or secondary depending on the context. If you are directly analyzing some aspect of the movie itself – for example, the cinematography, narrative techniques, or social context – the movie is a primary source.

**Is a painting a primary or secondary source?** An actual work of art, whether a painting or a building, is a primary source. A primary source is "first-hand" information, sources as close as possible to the origin of the information or idea under study.
