Two Kinds of Moral Reasoning: Ethical Egoism vs. JSTOR

Moral reasoning refers to the process of making judgments about right and wrong. Two prominent theories in moral reasoning are ethical egoism and JSTOR. Ethical egoism holds that the only action that can be morally right is one that promotes the self-interest of the actor. JSTOR, on the other hand, is a framework for moral reasoning that uses a set of principles to assess the morality of actions.

Ethical Egoism

Ethical egoism is a normative ethical theory that holds that an action is morally right if and only if it promotes the self-interest of the agent. Ethical egoists regard the pursuit of their own self-interest as the ultimate goal of all moral action. According to this theory, selflessness and altruism are irrational as they conflict with the primary goal of self-interest.

JSTOR

JSTOR is an acronym for "just sentences, theory of reasons." It is a framework for moral reasoning that uses a set of principles to evaluate the morality of actions. JSTOR principles include:

- **Universalizability:** An action is morally right if it can be universalized without contradiction.
- **Reversibility:** An action is morally right if it would be considered right if the roles of the agent and the recipient were reversed.
- **Impartiality:** An action is morally right if it treats all individuals as equals and does not discriminate based on irrelevant characteristics.

Comparison of Ethical Egoism and JSTOR

Ethical egoism and JSTOR differ in their fundamental approach to moral reasoning. Ethical egoism focuses solely on promoting self-interest, while JSTOR uses principles to evaluate the morality of actions based on their consequences and objectivity. Ethical egoism can lead to conflicts of interest and a disregard for the consequences of actions on others, while JSTOR promotes fairness, impartiality, and universality.

Which Theory Is "Better"?

There is no definitive answer to which theory is "better" as it depends on individual values and perspectives. Ethical egoism may align better with individuals who prioritize their own well-being, while JSTOR may appeal to those who value fairness, impartiality, and objectivity in moral reasoning. Ultimately, the choice between the two theories is a matter of personal judgment.
