Why is currency crashing? Put simply, we can say that, from a historical perspective, crises have developed when investor expectations cause significant shifts in the value of currencies. But a currency crisis—such as hyperinflation—is often the result of a shoddy real economy underlying the nation's currency.

When was the currency war? The Currency War of 2009–2011 was an episode of competitive devaluation which became prominent in the financial press in September 2010.
