She challenges readers not to allow their feelings to determine their destiny, but manage them for a joyful, victorious life.

What does Joyce Meyer say about feelings? Feelings are fickle. One day they're up, one day they're down, and other days we can't seem to find them at all. It's easy to make decisions based on what we want, think and feel?or what our emotions tell us is the right thing, right now. But we have to be very careful not to be led by our emotions.

How do you flush out your emotions?

What does Eckhart Tolle say about emotions? The deeper emotions are not really emotions at all but states of Being. Emotions exist within the realm of opposites. States of Being can be obscured, but they have no opposite. They emanate from within you as the love, joy, and peace that are aspects of your true nature.

What does the Bible say about thoughts and emotions? Philippians 4:6-7 "Do not be anxious about anything, but in everything by prayer and supplication with thanksgiving let your requests be made known to God. And the peace of God, which surpasses all understanding, will guard your hearts and your minds in Christ Jesus."

Are feelings based on thoughts? An emotion is an automatic and temporary reaction to a stressor in a part of the brain not connected to thinking and reasoning. Our feelings, on the other hand, are connected to thinking. They are our conscious processing of an emotion, where we assign the emotion meaning.

Where is childhood trauma stored in the body? Trauma is not physically held in the muscles or bones — instead, the need to protect oneself from perceived threats is stored in the memory and emotional centers of the brain, such as the hippocampus and amygdala. This activates the body whenever a situation reminds the person of the traumatic event(s).

Where is anxiety stored in the body? Shoulders & Chest. It's no surprise that the phrase “weight of the world on one's shoulder” means to carry heavy burdens or stress because the human body certainly knows how to hold stress in the shoulders and chest. Physical tension and emotional stressors tend to be held in this region of the body.
