**What do different dashboard warning lights mean?** Red is the equivalent of stop, and means the problem needs investigating immediately; orange or amber is an advisory signal, suggesting drivers will need to take action; and green says all is clear and serves as a helpful reminder. Here's a helpful guide to the most common dashboard warning lights.

**What is the gear with exclamation point light on Isuzu NPR?** The check transmission warning light lets you know when your transmission is experiencing issues. This light looks like a gear with an exclamation point in the middle of it.

**What do the little lights on my dashboard mean?** Green or blue lights simply let you know that a system is on or operating. Orange/yellow warning lights generally signify that your vehicle needs to be serviced or repaired soon. These warnings are less urgent than if you have a red and/or flashing light. A red light means that you should take action immediately!

**What is the system message indicator dashboard warning light?** System Message Indicator Light: The System Message Indicator Light is a yellow letter "i" inside a circle. This lets you know when there's a message regarding your vehicle's condition on the multi-information display.

**What is the most serious warning light?** The check engine light is usually the most serious and feared warning because of the kind of damage it can signal. This warning often indicates the potential for serious engine damage.

**What are the three main warning lights?**

**What is the ESC warning light on my Isuzu truck?** The electronic stability control (ESC) warning light can be caused by electrical issues such as a low car battery or a blown a fuse. If your car's ESC warning light is on, see your mechanic as soon as possible to get the problem diagnosed and fixed.

**What does an exclamation mark mean on a truck dashboard?** You might notice the orange exclamation mark on your dashboard. It's a common symbol often surrounded by a tire or flat tire icon. If you see this symbol, pay attention. It's typically an alert that one of your tires has dropped below 75% of its recommended pressure. It's an easy fix: You need to inflate the tire.

**What does a transmission warning light look like?** Identifying Transmission Light Indicators You might see a gear symbol with an exclamation mark or a thermometer, signaling potential transmission issues.

**When should I worry about dashboard lights?** Dashboard lights are generally color-coded, like traffic lights, to help you discern their level of importance. Red means that there's a serious problem brewing and that you should stop driving the vehicle. Yellow/orange often means that something needs to be serviced or repaired.

**What is the electrical warning light on my dashboard?** The electrical fault light depicts a car battery and is one of the most critical warning lights on your dashboard. When it illuminates, it signifies a problem somewhere in the electrical system of your vehicle.

**How to reset dashboard warning lights?** The first thing you can try, to turn off the car, then restart the engine. The second step is to disconnect your battery, wait for a few minutes then reconnect the battery. Another option is to continue to drive your car, and hope the light will reset itself.

**Why are all the warning lights on my dashboard on?** When all your dashboard lights turn on at once, it most commonly indicates an issue with the alternator or the charging system. It is common for all the dash lights to come on with no alternator output; low voltage can cause unusual electrical issues. The alternator should be tested at the time of battery replacement.

**What warning light looks like exclamation point?** Exclamation Point in a Circle: Brake Warning Lights The bright red circle with an exclamation mark inside indicates an issue with your brake system. This could be a routine warning or a sensor detecting depleted brake pads or low brake fluid.

**What is the orange warning light on dashboard?** If you see orange or yellow dashboard lights it is reminding you that something needs to be serviced soon, like an oil change, or that something is wrong with your emissions system. While not an emergency, you should have a car mechanic look at the problem as soon as possible.

**What does it mean if all my dashboard lights are on?** When all your dashboard lights turn on at once, it most commonly indicates an issue with the alternator or the charging system. It is common for all the dash lights to come on with no alternator output; low voltage can cause unusual electrical issues. The alternator should be tested at the time of battery replacement.

**What does a transmission warning light look like?** Identifying Transmission Light Indicators You might see a gear symbol with an exclamation mark or a thermometer, signaling potential transmission issues.

**What do different emergency lights mean?** Generally, red and white are used for emergency vehicles, amber for parking/bylaw enforcement, construction, utility vehicles, Amber and White for security vehicles, and green or red for volunteer firefighters as per various Provincial legislations.

**What is the most important indicator or warning light in a car?** Check Engine or Malfunction Indicator Light You'll see this light when there's an engine problem, and it may lead to the system operating abnormally. Bring your vehicle to the service department as soon as possible.
