**What are some questions about the transcontinental railroad?**

**Which areas of which railroads was the transcontinental railroad built on?** The Central Pacific Railroad Company started construction of the Transcontinental Railroad in Sacramento, California, while the Union Pacific Railroad Company started near the Iowa-Nebraska border. Both companies were promised vast amounts of land and government bonds for each mile of track laid down on the railroad.

**What events propelled the idea of extending a railroad across the nation?** In 1845, the New York entrepreneur Asa Whitney presented a resolution in Congress proposing the federal funding of a railroad that would stretch to the Pacific. Lobbying efforts over the next several years failed due to growing sectionalism in Congress, but the idea remained a potent one.

**Why was the Transcontinental Railroad placed where it was Quizlet?** This route was chosen over the route in the southern part of the country because it was less mountainous. The transcontinental railroad was usable despite the winter snows and was economically favorable.

**What were 3 reasons for the transcontinental railroad?** In addition to transporting western food crops and raw materials to East Coast markets and manufactured goods from East Coast cities to the West Coast, the railroad also facilitated international trade. The first freight train to travel eastward from California carried a

load of Japanese tea.

**What were 3 major benefits of the transcontinental railroad?** In addition to faster and easier business shipping, people could also travel faster and more cheaply than ever before. They could learn more about their nation, visit family that had moved away, and move to different parts of the country.

**Which group built most of the transcontinental railroad?** And in California, the Chinese made up a majority of the laborers. At its peak, about 90% of the railroad workforce was Chinese. Transcontinental railroad laborers worked in harsh conditions, and threats to their safety, like falling rocks or avalanches of snow, were always there, says Hirota.

**What 2 cities were connected by the first transcontinental railroad?** Answer and Explanation: The Transcontinental Railroad connected Omaha, Nebraska and Sacramento, California, thus establishing an efficient transportation route west of the Mississippi to the West Coast.

**What was the biggest obstacle in the way of building the transcontinental railroad?** The Sierra Nevada, the 400-mile-long range of granite peaks that form the backbone of California, was the most formidable obstacle in the construction of the Transcontinental Railroad. The only way past them was through.

**Which ethnic group constructed most of the transcontinental railroad?** At the height of the construction, 80-90% of the railroad workforce was Chinese. This article will cover the often untold history of the Chinese immigrants that built one of the most significant civil engineering marvels of the 19th century.

**Who benefited most from the construction of the transcontinental railroad?** The entire United States benefited financially from the joining of two railroads to form one transcontinental railroad. However, two industries benefited the most from the Transcontinental Railroad. Those were cotton and cattle.

**What was the golden spike on the transcontinental railroad?** The Golden Spike (also known as The Last Spike) is the ceremonial 17.6-karat gold final spike driven by Leland Stanford to join the rails of the first transcontinental railroad across the United States connecting the Central Pacific Railroad from Sacramento and the

Union Pacific Railroad from Omaha on May 10, 1869, at ...

**What town did both parts of the transcontinental railroad meet in?** The Railroad Act of 1862 put government support behind the transcontinental railroad and helped create the Union Pacific Railroad, which subsequently joined with the Central Pacific at Promontory, Utah, on May 10, 1869, and signaled the linking of the continent.

**What are some interesting facts about the transcontinental railroad?** The transcontinental railroad reduced the travel time between the East and West Coasts from as long as six months to under two weeks. It not only allowed more ease of movement for people but also for freight. As goods were distributed more quickly, demand increased and the U.S. economy expanded.

**What town did the transcontinental railroad begin?** Beginning in 1863, the Union Pacific, employing more than 8,000 Irish, German, and Italian immigrants, built west from Omaha, Nebraska; the Central Pacific, whose workforce included over 10,000 Chinese laborers, built eastward from Sacramento, California.

**What are two reasons the transcontinental railroad was not good?** The railroad was completed by the sweat and muscle of exploited labor, it wiped out populations of buffalo, which had been essential to Indigenous communities, and it extended over land that had been unlawfully seized from tribal nations.

**What were two major impacts of the transcontinental railroad?** The railroad opened the way for the settlement of the West, provided new economic opportunities, stimulated the development of town and communities, and generally tied the country together.

**What were some problems building the transcontinental railroad?** The following are two of the difficulties that builders of the transcontinental railroad found ways to overcome: Natural barriers such as mountains, rivers, and forests. A need for workers.

**What were the cons of the transcontinental railroad?** Negative Impact of the Transcontinental Railroad The Transcontinental Railroad had a negative effect on Native Americans of the plains. Many tribes were forced off their sacred lands by the construction of the railroad. The trains and train workers also took a great toll on the

population of bison in the west.

**Who decided where the transcontinental railroad would go?** The U.S. Congress was strongly divided on where the eastern terminus of the railroad should be—in a southern or northern city. Three routes were considered: A northern route roughly along the Missouri River through present-day northern Montana to Oregon Territory.

**Is the original transcontinental railroad still in use?** Much of the original route, especially on the Sierra grade west of Reno, Nevada, is currently used by Amtrak's California Zephyr, although many parts have been rerouted. The resulting coast-to-coast railroad connection revolutionized the settlement and economy of the American West.

**What issues did the transcontinental railroad have?** Each company faced unprecedented construction problems—mountains, severe weather, and the hostility of Native Americans. On May 10, 1869, in a ceremony at Promontory, Utah, the last rails were laid and the last spike driven.

**What are some important facts about the transcontinental railroad?** The transcontinental railroad reduced the travel time between the East and West Coasts from as long as six months to under two weeks. It not only allowed more ease of movement for people but also for freight. As goods were distributed more quickly, demand increased and the U.S. economy expanded.

**What was the hardest part of the transcontinental railroad?** The most challenging part for the Central Pacific was building through the Sierra Nevada mountains between California and Nevada. Winter was a particularly difficult time of year. What were some of the challenges faced by workers during the construction of the transcontinental railroad?

**What was the biggest obstacle to the transcontinental railroad?** Builders of the transcontinental railroad faced geographical obstacles across the entire line. But none were quite as formidable as the snowy granite mountain range rising east of Sacramento. Getting through the Sierra Nevada would require fortitude, technology -- and the sacrifice of many workers' lives.
