Why do we use water while using a high speed handpiece? Because the bur rotates so fast, high-speed handpieces generate a lot of heat. To counter this heat, high speed handpieces feature cooling water sprays.

How long should a handpiece be lubricated for? For aerosol oil, with the bur inserted (for the high-speed), spray lubricant for 1 second into the air intake and run on purge unit for 20 seconds, or until all excess oil is expelled. If expelled oil is colored, repeat the lubrication process until expelled oil is clear.

When should handpiece lines be flushed? Flush waterlines at the start of each day AND for 30 seconds before each patient by dispelling water into a sink, denture cup, vacuum hose, or other appropriate method. Items to flush include, but are not limited to, all handpieces, ultrasonic unit, and air/water syringes.

What is usually recommended before sterilizing handpieces? Pre-sterilization consists of lubrication using an acceptable form of handpiece lubricant, wiping down using a sterilization wipe, and preparing for the autoclave. Step 2, is simply just sterilization. Throw those things into the autoclave and let it work its magic!

What is the best method to remove debris from the head of the handpiece? Flushing the handpiece is the best way to remove debris from the head of the handpiece. To flush a dental handpiece: Attach a pressurized handpiece cleaner to the intake tube of the handpiece (where the air passes through). Flush the head of the handpiece to remove debris.

What is the best sterilization for handpiece? Sterilize at 135°C (275°F) for 10 minutes. Place each handpiece in a separate paper/plastic steam-sterilizing pouch. Use the steam autoclave drying cycle by setting the cycle for 60 minutes. Allow the handpiece to cool to room temperature before use.

Star Wars Storyboards: The Original Trilogy - A Behind-the-Scenes Look

1. What are storyboards and why are they important?

Storyboards are a visual representation of a film's shots, depicting the camera angle, composition, and action for each scene. They help filmmakers plan and communicate their vision to the crew and actors. In the Star Wars universe, storyboards played a crucial role in bringing the epic space saga to life.

2. Who created the storyboards for the Original Trilogy?

The storyboards for Star Wars Episodes IV-VI were primarily created by Ralph McQuarrie, Joe Johnston, and Nilo Rodis-Jamero. McQuarrie was the concept artist who designed the iconic characters and vehicles, while Johnston and Rodis-Jamero were storyboard artists responsible for translating McQuarrie's designs into actionable shots.

3. Where can I download the original storyboard sketches?

Various online resources offer the opportunity to download high-resolution storyboard sketches from the Original Trilogy. Websites like StarWarsArchives.com and ImperialWarMuseum.org host digital archives of production materials, including storyboards. It's recommended to check the copyright and usage rights before downloading or using the sketches.

4. What insights do the storyboards provide into the filmmaking process?

Examining the storyboards reveals the evolution of ideas from concept to final product. They showcase alternative angles, unused shots, and deleted scenes that shed light on the creative process behind some of cinema's most iconic moments.

5. How have the storyboards influenced Star Wars fandom?

The storyboards for the Original Trilogy have become highly sought-after collectibles and inspiration for fan art, cosplay, and other creative pursuits. They offer a glimpse

into the behind-the-scenes development of the beloved franchise and continue to captivate Star Wars enthusiasts worldwide.
