How to reset fuel used on Suzuki outboard? The Total Fuel Used gauge may be reset to zero using the submenu. Pressing and holding the “Mode” button causes the display to change to the “settings” submenu (see Figure 3, page 9). There is one item in the Fuel Used “Settings” Menu; Reset. Pressing the “Up” or “Down” button resets the Total Fuel Used gauge to zero.

Why are Suzuki outboards so popular? Suzuki's engines are renowned for their durability and dependability, traits that have solidified their reputation among commercial and recreational boaters alike.

How many hours will a 2 stroke outboard last? The old 2 stroke outboards had an expected lifetime of 1500 hours, while the modern 4 strokes are expected to have 4000 hrs. An electric motor can last for tens of thousands of hours* (with battery replacement), with a notable increase over the 4,000 hour average of high-end petrol outboards.

Should you flush your outboard motor after every use? Flushing your outboard motor after every saltwater use is a small yet impactful practice that pays dividends in the long run. By incorporating this routine into your post-boating ritual, you're not just preventing corrosion but safeguarding your marine engine's performance and longevity.

How many years can a Suzuki last? The answer depends on how the car is driven and where it is driven. On an average, an Suzuki car can live upto 10–15 yrs easily, provided it is taken care of.

What is the longest lasting engine?

Are Suzuki engines any good? How reliable are Suzuki cars? As we said, Japanese car manufacturers are renowned for their reliability and Suzuki is no different. The Telegraph put Suzuki 2nd in their reliability table, coming in behind only Skoda. Suzuki had just 79 problems per 100 vehicles, well below the industry average.

What is the most reliable outboard motor brand?

What is the best fuel for a Suzuki outboard motor? Why REC90 is the Best Choice for Suzuki Outboard Motors. REC90, an ethanol-free gasoline, emerges as the best fuel choice for several compelling reasons: Reduced Moisture Absorption: Without ethanol, REC90 significantly lowers the risk of moisture-related issues, such as corrosion and phase separation.

What's better 2 stroke or 4-stroke boat motors? Traditionally, because of the simplicity and light weight, 2-stroke outboards have dominated the outboard market. It is widely understood that modern 4-stroke outboards are quieter, produce less vibration and create significantly less pollution.

What does 3 beeps mean? 3 beeps may be a recording if you are calling a business line. In some states it is required by law to give an auditory sound a call is being recorded.

What does 6 beeps mean on a boat? Six intermittent beeps on this engine is for a non critical warning, basically like a check engine light on your car. It is telling you one of the sensors on the motor is reading out of range but it is not a sensor that will harm the motor.

What does 3 beeps on toll mean? 3 beeps: Your account balance is low. Top up your account as soon as possible to avoid suspension. 4 beeps: Your account has been suspended. Pay the overdue amount as soon as possible or you may receive a

toll invoice.

How long can you leave an outboard without flushing? The outboard should be flushed after every use in salt or dirty water.

Can you run a Suzuki outboard while flushing? Switch off the outboard motor – never flush with the motor running. Remove the plug from the port – with the Suzuki, it's an easy-to-reach side port with a plug that just pulls out fast. Insert the flush fitting – it's a fitting that allows you to connect a hosepipe to the port in your outboard.

Can you flush an outboard without it running? The engine can be running or not when flushing, and flushing should be for at least three minutes.

How many hours can you get on a Suzuki outboard? A generally accepted lifetime rule of thumb is that an outboard motor can last about 1500 hours to over 4000 hours (if used and serviced regularly).

Is 500 hours on an outboard a lot? If you have kept up with the service schedule, and your boat has between 500-1,000 hours, you probably won't need to replace the engine for at least the next 5 to 7 years, depending on how often you use it. In most cases, they start to run rough and begin showing signs of wear and tear.

Is 200 hours on an outboard a lot? Boat Engines: Typically an average gas engine will run about 1500 hours before it needs a major overhaul. That means when properly maintained on a routine basis with around 200 hours a year, it will last for more than seven years.

How many hours do 4 stroke outboards last? If maintained well and used regularly at moderate rpms, up to 5000 hrs is realistic.

How many hours will a 2 stroke outboard last? I don't remember where I read this, but 2 strokes were designed to last for up to 1,500 hours with regular maintenance and good oil. 4-stroke outboards (according to the article I read) should last way up in the thousands of hours exactly like a car engine.

How long can an outboard motor sit without running? As long as it's well maintained before going into storage, a boat can sit for a few months, a few years or even a few decades. Neglecting to prep it for storage, though, will necessitate

massive repairs or even a total rebuild.

How many hours is bad on an outboard motor? Well-maintained inboard engines, inboard outboard engines (unless diesel), and outboards have a serviceable average life of about 1500-2000 hours. If you're looking at a gas-fueled marine engine close to or exceeding 1000 hours, inboard or outboard, proceed with caution.

Why do boat engines not last long? Many marine engines sit very low in the bilge and water is consistently in contact with the oil pan. Over the years this can corrode and cause pinhole leaks in the pan.

How many engine hours is too much? According to automotive industry experts, they may say that 1500-2000 hour is limit for gasoline engines, but it is hard to say without considering the quality of maintenance and service it gets throughout the lifetime.

Is 650 hours a lot for a boat? So for a 5-year old boat, anywhere between 375 to 750 engine hours would be considered reasonable. Boats that are 15-20 years old should be approached with a little more caution, even if their engine hours are within the reasonable range. Well-maintained engines have an average lifespan of about 1500-2000 hours.

What age boat is best to buy? It's easy to get off track when you only pay attention to price versus focusing on the type of boat you'd like to buy. Your next step is to pay attention to the used boat's age and engine hours, we recommend looking for used boats that are under 10 years old with less than 500 hours logged.

How much does it cost to rebuild an outboard motor? Rebuilding your current engine of the same size might cost about \$2500 or so — or about a third of the cost of a new engine. Buying a rebuilt engine, backed by a reputable dealer of course, would split that difference, or about \$3000 to \$4000. That difference will buy a lot of gas, so consider carefully.

How many hours does it take to break in an outboard motor? Once the hour-meter hits the 10-hour mark, the break-in process is complete and you are free to

run the engine as you normally would. Because there are some variations based on

the outboard you own, it is critical that you follow the exact steps outlined in your Mercury Outboard Operation and Maintenance Manual.

How many hours is a lot on a Suzuki outboard? A 4 stroke Suzuki that has been regularly maintained should last 3000 - 4000 hours. Low hours is not always a good thing. Outboard engines like to be run.

What are the bad years for Yamaha outboards? The first-generation Yamaha F-Series models, manufactured between 2000-2005, are notorious for severe and unusually fast dry exhaust corrosion problems. The F225 models, in particular, experienced this issue after only 500-700 hours of use.

Are 2-stroke outboards faster? Because they have fewer parts, 2-stroke motors are generally smaller and lighter than 4-stroke motors. Lighter weight also allows 2-stroke engines to run faster. As a result, when making a 2-stroke vs. 4-stroke outboard power comparison, 2-stroke motors usually win out.
