Sharon and My Mother-in-Law: A Confrontation in Ramallah Diaries

Suad Amiry's "Sharon and My Mother-in-Law" is a poignant account of a confrontation between Amiry's mother-in-law and former Israeli Prime Minister Ariel Sharon. This encounter raises profound questions about the human cost of war and occupation.

Q: Why did Amiry's mother-in-law decide to confront Sharon? A: Amiry's mother-in-law, who had lost loved ones in the Israeli-Palestinian conflict, was enraged by Sharon's visit to Ramallah, the Palestinian city where she lived. She believed that Sharon was personally responsible for the suffering of her people.

Q: What does the confrontation symbolize? A: The confrontation between Amiry's mother-in-law and Sharon represents the broader conflict between Palestinians and Israelis. It highlights the personal pain and losses caused by political violence and the deep-seated resentment and anger that exists on both sides.

Q: How does Sharon respond to the confrontation? A: Sharon's response is a mixture of annoyance and defensiveness. He dismisses Amiry's mother-in-law's accusations as "lies" and tries to justify his actions by claiming that he is simply trying to protect his country.

Q: What is Amiry's perspective on the confrontation? A: Amiry, who is a Palestinian architect, sees the confrontation as a clash between two different worlds. She believes that Sharon's perspective is based on a false narrative of history and a lack of empathy for the Palestinian people.

Q: What are the implications of the confrontation for the future of the Israeli-Palestinian conflict? A: The confrontation between Amiry's mother-in-law and Sharon serves as a reminder of the complexities and challenges of resolving the Israeli-Palestinian conflict. It highlights the need for empathy, understanding, and a willingness to confront the painful realities of the past in order to create a more just and peaceful future.

Structural Investigation of Historic Buildings: A Case Study Guide to Preservation Technology

Question: What does a structural investigation of a historic building entail?

Answer: A structural investigation involves assessing the load-carrying capacity, stability, and integrity of a historic building's structural system. It includes visual inspection, archival research, load testing, and possibly non-destructive testing methods (NDTs) such as ground-penetrating radar or infrared thermography.

Question: How does preservation technology play a role in structural investigations?

Answer: Preservation technology provides methods and techniques to mitigate the effects of deterioration and strengthen historic buildings. This can include repairing or replacing damaged members, adding reinforcement to improve load capacity, and implementing seismic upgrades to enhance resistance to earthquakes.

Question: What are some notable case studies of structural investigations and preservation of historic structures?

Answer: Case studies include the restoration of the Parthenon in Athens, Greece; the seismic strengthening of the Colosseum in Rome, Italy; the repair of the Tower of Pisa in Pisa, Italy; and the adaptive reuse of historic mills in New England.

Question: How does digital technology enhance structural investigations and preservation?

Answer: Digital technology, such as laser scanning and 3D modeling, allows for accurate documentation, monitoring, and analysis of historic structures. It also facilitates the design and implementation of preservation interventions, ensuring minimal disruption to the building's fabric.

Question: What are the benefits of conducting structural investigations for historic buildings?

Answer: Structural investigations help identify potential structural deficiencies, guide preservation interventions, extend the lifespan of historic buildings, and ensure their continued safety and accessibility for generations to come. By understanding the structural behavior of these landmarks, we can preserve their cultural and architectural heritage while ensuring their enduring presence in our built environment.
