#### What is a Solution Matrix?

A solution matrix is a tabular representation that compares and evaluates potential solutions or alternatives for a given business problem or opportunity. It systematically organizes information about each solution, enabling decision-makers to make well-informed choices based on predefined criteria.

#### Components of a Solution Matrix

The solution matrix typically comprises the following columns:

1. **Criteria:** These represent the factors or metrics used to assess the solutions, such as cost, effectiveness, feasibility, and risk.

2. **Weighting:** Each criterion is assigned a weight that reflects its relative importance in the decision-making process.
