### How to learn astrology for beginners?

**Is astrology fake?** Astrology has been rejected by the scientific community as having no explanatory power for describing the universe. Scientific testing has found no evidence to support the premises or purported effects outlined in astrological traditions. Where astrology has made falsifiable predictions, it has been falsified.

**How to explain astrology to a beginner?** Astrology is simply a way of seeing the world and positioning ourselves within a larger cosmic conversation. To benefit from astrology's wisdom, you don't need to "believe" that the planets are impacting our day-to-day lives (i.e., Pluto traversing your house of relationships isn't causing drama with your beloved).

**What is the basic knowledge of astrology?** Astrology is a method of predicting mundane events based upon the assumption that the celestial bodies—particularly the planets and the stars considered in their arbitrary combinations or configurations (called constellations)—in some way either determine or indicate changes in the sublunar world.

**Can you be a self taught astrologer?** Begin with Self-Study Start your astrological journey by diving into the vast ocean of astrological knowledge available in books, online resources, and courses. Begin with the basics: learn about the zodiac signs, planets, houses, and aspects.

### Where do I start to understand astrology?

**What does the Bible say about astrology?** Believing in the power and authority of astrology goes directly against biblical wisdom and Scripture clearly states that chasing after false gods is a sin (Matthew 24:24, 1 Corinthians 8:6, Exodus 20:3). There is no biblical evidence that God has given authority to the stars or astrologists.

**Is astrology 100% true?** Astrology may not be 100% accurate, but some characteristics are shockingly true.

**Does astrology tell the truth?** But some scientists say it's not real science. Let's see why. Scientists say astrology doesn't have enough proof to show it's true. Even though people have been studying it for a long time, there's no clear evidence that the stars and planets actually affect our behavior or what happens in our lives.

**What should I learn first about astrology?** Start with the Basics: Begin by understanding the foundational concepts of astrology, such as the zodiac signs, planets, houses, and aspects. Familiarize yourself with the astrological symbols and terminology. Books and Online Resources: Read introductory astrology books written by reputable astrologers.

**How do people know their signs?** A person's particular sign of the zodiac is the one that the sun was in when they were born. It is a belief in astrology that a person's personality can be predicted using their sign of the zodiac.

**How to learn your zodiac chart?** To find your birth chart, you'll need three things: the date, time, and location of your birth. (Yep, you'll need to text your mom or dig up your birth certificate.) Once you have that information, head to an online birth chart calculator, such as Cafe Astrology, and fill out the form.

**What is the most important thing in astrology?** Conjunctions are a major aspect in a horoscope chart. They are said to be the most powerful aspects, because they mutually intensify the effects of the involved planets.

**Is there any logic behind astrology?** Astrology is founded on understanding the positions of the stars, which seems like a scientific enough pursuit in itself. But is there any science to back up whether astrology impacts our personality and our lives? Here's the short Answer: No. None whatsoever.

**Who created astrology?** It originated in Mesopotamia (c. 3rd millennium bc) and spread to India, but it developed its Western form in Greek civilization during the Hellenistic period. Astrology entered Islamic culture as part of the Greek tradition and was returned to European culture through Arabic learning during the Middle Ages.

**Is there an app that teaches astrology?** With Brainscape, you'll learn all the most important things to know about astrology. Brainscape is here to help you memorize the fundamental signs, personality traits, and romantic compatibilities from both the traditional horoscopic and Chinese lunar calendars.

**Do you need a certification to be an astrologer?** Is There Specific Schooling Needed to Become an Astrologer? You can enroll in different astrology courses, but there is no requirement to do so. Similarly, there is no accreditation or license required to become an astrologer. The state and federal governments do not require such certification.

**What is the difference between an astrologer and an astrologist?** While there are occasionally some astrologers who do use the term astrologist, and that is ok, the purpose of this discussion is to clarify that since the vast majority of practitioners prefer the term astrologer, that is the word that should probably be used by non-astrologers when referring to the profession.

**How do you read your own astrology?** In order to read an astrology chart accurately, you will need to take into consideration where the planets appear. What house do they appear in and under which sign? This will give you insight into your personality and life path. Planets represent what you do, that is, what you enjoy and what drives you.

**What is astrology for dummies?** Astrology holds that the sun, the moon, and the planets represent different facets of who you are and express their energies through the signs that they occupy in your birth chart.

**What can astrology tell you?** Within the folds of this circular map, you'll find all the planets and celestial objects tracked in astrology, along with the zodiac signs they were occupying — and these locations in the sky at the exact moment of your birth

can provide you with personalized insight into your career, love life, friendships, and
