### 250 Best Answer MCQs for Clinical Medical Exam Preparation: A Comprehensive Guide

Preparing for clinical medical exams requires a thorough understanding of complex medical concepts. The "250 Best Answer MCQs for Clinical Medical Exam Preparation" book offers a comprehensive resource to help students master these concepts with over 23,000 words of detailed explanations.

**Question:** Which of the following is not a symptom of acute appendicitis? (A) Abdominal pain in the right lower quadrant (B) Rebound tenderness (C) Dysuria (D) Nausea

**Answer:** (C) Dysuria

**Explanation:** Dysuria is a symptom of a urinary tract infection, not acute appendicitis. The other options are all classic symptoms of acute appendicitis.

**Question:** What is the most common cause of acute pancreatitis? (A) Gallstones (B) Alcoholism (C) Infection (D) Trauma

**Answer:** (A) Gallstones

**Explanation:** Gallstones are the most common cause of acute pancreatitis, accounting for about 40% of cases. Alcoholism and trauma are also common causes.

**Question:** Which of the following is a sign of heart failure? (A) Jugular venous distension (B) Third heart sound (C) Peripheral edema (D) All of the above

**Answer:** (D) All of the above

**Explanation:** Jugular venous distension, third heart sound, and peripheral edema are all signs of heart failure. These signs indicate elevated central venous pressure and impaired cardiac function.

**Question:** What is the most common type of stroke? (A) Hemorrhagic stroke (B) Ischemic stroke (C) Transient ischemic attack (D) Embolic stroke

**Answer:** (B) Ischemic stroke

**Explanation:** Ischemic strokes account for about 87% of all strokes. They occur when a blood clot blocks an artery supplying blood to the brain.

**Question:** Which of the following is a risk factor for developing type 2 diabetes mellitus? (A) Obesity (B) Physical inactivity (C) Family history (D) All of the above

**Answer:** (D) All of the above

**Explanation:** Obesity, physical inactivity, and family history are all major risk factors for developing type 2 diabetes mellitus.
