Success = Value + People + Process The good news is—unofficial project managers can build confidence to lead high-value projects and engage teams in a way that inspires them to volunteer their best efforts.

**Why is informal authority so important to the unofficial project manager?**

To have real project success, you need what we call “informal authority”. Informal authority inspires people to want to play on your team and win. Informal authority comes from the character and capabilities of a leader. You need to inspire trust through character and integrity.

**What is the 0 100 rule in project management?**

Using the 0/100 rule, no credit is earned for an element of work until it is finished. A related rule is called the 50/50 rule, which means 50% credit is earned when an element of work is started, and the remaining 50% is earned upon completion.

## Is the role of a project manager irrelevant in an agile project why or why not?

The Agile framework focuses on self-organization and team empowerment rather than defining specific roles, which is why there is no need for a Project Manager in the traditional sense; the role is pretty much covered between all the existing roles.
