The Five-Second Rule and Other Myths About Germs: What Everyone Should Know About Bacteria, Viruses, Mold, and Mildew

Throughout history, fear of germs has often led to misconceptions and unrealistic hygiene practices. Here are some common myths and the science behind them:

1. The Five-Second Rule: Can You Eat Food Dropped on the Floor?

Myth: Food dropped on the floor for five seconds or less is safe to eat.

Fact: The five-second rule is not supported by science. Germs can transfer to food instantly upon contact with the floor. The risk of contamination depends on several factors, including the type of surface, the amount of bacteria present, and the moisture content of the food. It's generally best to avoid consuming food that has been on the floor.

2. Antibacterial Soap Is the Best Choice:

Myth: Antibacterial soaps are more effective than regular soap in killing germs.

Fact: While antibacterial soaps contain chemicals that kill bacteria, regular soap is just as effective at removing germs and dirt from the skin. Antibacterial soaps can also contribute to the development of antibiotic-resistant bacteria.

3. Mold and Mildew Are the Same Thing:

Myth: Mold and mildew are interchangeable terms for the same fungus.

Fact: Mold and mildew are distinct types of fungi. Mold typically has a fuzzy or powdery texture, while mildew is flat and slimy. Both can cause health problems, including respiratory issues and allergic reactions.

4. Viruses Can Live on Surfaces for Days:

Myth: Viruses can survive on surfaces for long periods of time.

Fact: The survival time of viruses on surfaces varies depending on the virus and the environmental conditions. However, most viruses cannot survive for more than a few hours or days on surfaces. Proper disinfection measures, such as cleaning with household cleaners or bleach solutions, can effectively kill viruses.

5. Bleach Kills Everything:

Myth: Bleach is a powerful disinfectant that kills all microorganisms.

Fact: While bleach is an effective disinfectant against many bacteria and viruses, it is not effective against all microorganisms. Certain bacteria and spores, such as *Clostridium difficile* (C. diff), are resistant to bleach. It's important to follow proper disinfection guidelines and use specific products designed for the target microorganisms.

The Righteous Mind: Unlocking the Moral Psyche

Jonathan Haidt's groundbreaking book, "The Righteous Mind," explores the complex interplay between morality and psychology. Here's a Q&A summarizing key insights from the book:

Q: What is the "Moral Matrix"? A: Haidt theorizes that human morality is shaped by five fundamental moral foundations: Care/Harm, Fairness/Cheating, Loyalty/Betrayal, Authority/Subversion, and Sanctity/Degradation. These foundations form a matrix that influences our moral judgments and behavior.

Q: Why do we often disagree morally with others? A: Haidt argues that different people place varying emphasis on different moral foundations. This disparity leads to

moral conflicts and misunderstandings. For example, those who prioritize Care may view abortions as immoral, while those who prioritize Fairness may view them as a necessary choice.

Q: How does intuition play a role in morality? A: According to Haidt, much of our moral judgment is driven by automatic, emotional responses rather than deliberate reasoning. These intuitive responses are linked to our moral foundations and can make it difficult to engage in rational discussions about morality.

Q: What is moral binding? A: Haidt introduces the concept of moral binding, which refers to the tendency of people to believe that their moral beliefs are absolute and universally applicable. This belief can lead to intolerance and conflict, as people struggle to understand and accept alternative perspectives.

Q: How can we overcome moral disagreements? A: Haidt suggests that fostering empathy and understanding between different moral viewpoints is crucial. By acknowledging the complexity of morality and recognizing the validity of diverse perspectives, we can bridge divides and engage in productive dialogues about ethical issues.
