**Michael A. Leeds:** Sports have become a global phenomenon, transcending boundaries and uniting people from all walks of life. They foster health, well-being, and inclusivity while also providing entertainment and inspiration.

**Leeds:** Technology is revolutionizing sports by enhancing training, improving performance, and providing fans with unprecedented access. Analytics, wearable devices, and virtual reality are reshaping how we experience sports.

**Von Allmen:** However, it's important to ensure that technology complements and enhances the human experience rather than replacing it.

#### **How to learn a foreign language Dr. Paul Pimsleur?**

**Can you become fluent in a language with Pimsleur?** At the end of all the 150 lessons, I didn't remember everything I had learned, but I had a good foundation that prepared me for the next step in my language learning. "Pimsleur is not where you will get fluent. It's where you'll get started on your journey toward fluency."

**Does the FBI use the Pimsleur method?** The Pimsleur Method is now used by the FBI, Homeland Security, State Department, Marine Corps, and Navy, Fortune 500 companies such as Mercer and Alcoa, as well as diplomats, journalists, aid workers, and business executives who need to learn a language quickly and effectively.

**How long does it take to learn a language with Pimsleur?** If you are a language learner of average ability, and you undertake an "easy" language, it will probably take you about 220 hours to get to the first level of mastery in speaking it, and double that to get to Level 2.

**Does Pimsleur have free lessons?** Try Pimsleur for Free. Select a language you want to learn, and try the first lesson now for free. Once you discover how much you can learn in 30 minutes, you will want to keep going.

**What is the difference between Rosetta Stone and Pimsleur?** The Pimsleur lessons are centered around interactive audio lessons with fluent speakers, while the Rosetta Stone lessons revolve around imagery and language immersion. In other words, Rosetta Stone is very image heavy and Pimsleur is very audio heavy.

**Is Duolingo or Pimsleur better?** The clearest advantage of the Pimsleur program is that they are much better than Duolingo at developing your verbal skills. One of the biggest accelerants of learning a language is getting immersed. You need to hear and speak the language in heavy doses, and frequently.

**How much is Pimsleur per month?** With Pimsleur, you have your choice between two packages: the Pimsleur Premium plan, which costs \$20 per month and includes access to one language, or for \$1 more per month, you can upgrade to the Pimsleur All Access plan, which includes access to all Pimsleur languages (there's over 50 of them).

**Do polyglots use Pimsleur?** The only polyglots I heard recommend Pimsleur said that they like to use a few lessons of it in the beginning in order to develop their accent and comfort level in a new language. Michel Thomas has more fans among polyglots, but not as many as Assimil.

**How does the CIA learn languages so quickly?** Immersion and frequent practice in real-life situations play a crucial role in language acquisition. Spies actively seek opportunities to immerse themselves in the target language, whether by traveling to a foreign country or engaging with native speakers in their own community.

**What's the difference between Pimsleur and Babbel?** How do Pimsleur and Babbel compare? Lesson format is one of the biggest differences between Pimsleur and Babbel. The Pimsleur lessons are longer and primarily revolve around interactive audio lessons with fluent speakers, whereas the Babbel lessons are shorter and include a greater variation of practice drills.

**Who owns Pimsleur?** Corporate structure. Pimsleur Language Programs is owned by Simon & Schuster Audio, a division of Simon & Schuster, which is part of Kohlberg Kravis Roberts.

**Why doesn't Pimsleur work?** One common criticism of the Pimsleur Method™ is that it doesn't teach enough vocabulary. Each language series only introduces a few hundred new words in total. The exact amount depends on how many levels there are since some languages have only one level and others have three, four or five.

**Can I learn Japanese with Pimsleur?** Pimsleur will teach you to learn the Japanese language, whether you're brand new to the language or brushing up on what you learned in high school or college. You'll find this experience to be enriching, educational, and enjoyable.

**Does Pimsleur teach you to read?** The Reading Lessons are a separate part of the course that teaches reading skills through a phonetic approach developed by Dr. Pimsleur. The lessons teach the sounds of individual letters and how letters combine to form new sounds.
