What is an Array: Computer Science Concepts\*\*

**Array in 2nd PUC Computer Science** An array is a data structure that stores a finite collection of elements of the same type, accessed using an index.

**HTML in Computer 1st PUC** HTML stands for Hypertext Markup Language and is the primary language used to create web pages.

### Types of Arrays

- One-Dimensional Array
- Two-Dimensional Array
- Multi-Dimensional Array
- Jagged Array

**Stack in 2nd PUC** A stack is a data structure that follows the Last-In-First-Out (LIFO) principle.

**Web Hosting in 2nd PUC** Web hosting is a service that provides the necessary space and infrastructure for websites to be accessible on the internet.

**HTML in One Word Answer** Markup

**HTML in Computer PDF** Refer to computer science textbooks or online resources for detailed PDF documents on HTML.

**Syntax of Array**

```
data_type array_name[size];
```

**3D Array** A 3D array is an extension of a two-dimensional array, where an additional dimension is added, resulting in a three-dimensional structure.

**Array in C++** An array in C++ is a fixed-size data structure that stores elements of the same data type.

### **Difference between Linked List and Array**

- Arrays are contiguous in memory, while linked lists are not.
- Arrays have fixed size, while linked lists can grow dynamically.

### **Disadvantages of Data Structure**

- Increased memory usage
- Complexity in implementation
- Difficulty in debugging

**Stacks in Python** Stacks in Python can be implemented using the `list` data structure with Last-In-First-Out (LIFO) behavior.

**Array in Computer Science** An array is a fundamental data structure that stores a sequence of elements of the same data type, accessed by index.

**Array in Class 12 Computer Science** An array in class 12 computer science is a structured data type that holds multiple elements of the same type and size.

**Short Answer: Array** A collection of elements of the same type accessed through an index.

**Array of Objects Class 12** An array of objects is a collection of objects of a particular class, stored contiguously in memory.
