It is designed for learners with a basic understanding of English who want to improve their listening and speaking skills to a more advanced level. The book provides clear explanations and ample practice opportunities to help learners achieve their goals.

Science and Religion from Copernicus to Darwin

Question: How did Copernicus's heliocentric model of the solar system challenge religious views?

Answer: Copernicus's theory that the Sun, not Earth, was the center of the universe contradicted the prevailing geocentric model supported by the Catholic Church. This raised questions about the literal interpretation of biblical passages that described a flat Earth and placed humans at its center.

Question: What role did Galileo play in the conflict between science and religion?

Answer: Galileo's observations of Jupiter's moons and the phases of Venus provided evidence for Copernicus's model. However, his insistence on presenting his findings as factual rather than hypothetical led to a conflict with the Church, which condemned his views as heretical.

Question: How did Newton's discoveries influence religious beliefs?

Answer: Isaac Newton's laws of motion and gravitation provided a scientific explanation for the order and predictability of the universe. This challenged the idea of a capricious deity and reinforced the concept of a rational and law-abiding God.

Question: What were the key tenets of Darwin's theory of evolution?

Answer: Charles Darwin's theory of evolution by natural selection proposed that all living organisms descended from a common ancestor and that variation and differential survival led to the diversity of life. This challenged the biblical account of creation and raised questions about the origin and purpose of human existence.

Question: How did the rise of scientific rationalism impact religious faith?

Answer: The scientific discoveries of the 15th to 19th centuries gradually eroded the authority of religious dogma. However, it also led to a reassessment of faith, with some seeking to reconcile science and religion through natural theology (e.g., William Paley) and others embracing a more secular worldview.
