Implicit information is information which is suggested, but never directly stated. Implicit information is implied to the reader, for example, "Miles moved away from the dog."

**What is explicit and implicit literacy?** An explicit instructional strategy is similar to a direct instruction approach where students anticipate a goal to focus on while reading. Implicit instructional strategies use more of an organic approach to highlight comprehension skills as they naturally come up in reading.

### **What is a tribunal?**

A tribunal is an independent body that adjudicate disputes and make decisions that are legally binding. Tribunals differ from courts in that they are not part of the regular court system and are often created to deal with specific types of disputes, such as employment disputes or immigration cases.

### **What are the general procedures for a tribunal hearing?**

The procedures for a tribunal hearing can vary depending on the specific tribunal and the type of dispute being adjudicated. However, the general steps involved usually include:

- **Pre-hearing conference:** The tribunal may hold a pre-hearing conference to discuss the issues in dispute, exchange documents, and set a schedule for the hearing.
- **Hearing:** The hearing is the main event, where the parties present their evidence and arguments. The tribunal may also hear from witnesses and experts.
- **Decision:** After the hearing, the tribunal will issue a decision that is legally binding and explain the reasons for the decision.

### **What are some of the common mistakes made by parties in tribunal proceedings?**

Some of the common mistakes made by parties in tribunal proceedings include:

- **Not being prepared:** Parties should be well-prepared for their hearing, including understanding the relevant law and evidence.
- **Not following the rules:** Tribunals have specific rules and procedures that parties must follow. Failure to follow these rules can result in the case being dismissed or the decision being overturned.

- **Not seeking legal advice:** Parties who are not familiar with the tribunal process should consider seeking legal advice to help them navigate the proceedings.

### **What are some of the advantages of using a tribunal?**

There are several advantages to using a tribunal, including:

- **Expertise:** Tribunals are often staffed by experts in the specific area of law being adjudicated. This ensures that the decisions are made by individuals who have a deep understanding of the relevant issues.
- **Efficiency:** Tribunal proceedings are often faster than court proceedings, which can save time and money for the parties involved.
- **Flexibility:** Tribunals can be more flexible than courts in terms of scheduling and procedures, which can make them a more accessible option for parties.

### **What are some of the disadvantages of using a tribunal?**

There are also some disadvantages to using a tribunal, including:

- **Lack of precedent:** Unlike courts, tribunals are not bound by precedent, which means that decisions may not be consistent from one case to the next.
- **Limited scope of review:** The scope of review for tribunal decisions is often more limited than for court decisions, which means that it may be more difficult to overturn a tribunal decision on appeal.
- **Lack of enforceability:** Tribunal decisions are not always easily enforced, especially if the losing party does not comply with the order.
