Who founded discrete mathematics? Never, mathematicians say, has there been an individual like Paul Erdős. He was one of the century's greatest mathematicians, who posed and solved thorny problems in number theory and other areas and founded the field of discrete mathematics, which is the foundation of computer science.

Is discrete math harder than linear algebra? Is Linear Algebra A Hard Subject? Many students regard linear algebra as a difficult study. It is more challenging than discrete mathematics which is usually a first-year program taught in most STEM majors. Linear algebra is taught in its second year and demands robust reasoning and analytical skills.

Who are the famous discrete mathematicians? Martin KRUSKAL and Peter HAMMER, TWO GIANTS OF DISCRETE MATHEMATICS.

Who is the father of discrete geometry? Euclid was a Greek mathematician and is called 'father of Geometry'. He compiled elements which have several geometric theories. These are still used by mathematicians all around the world. Q.

Who came up with discrete geometry? Coxeter (Canada), C. A. Rogers (United Kingdom), and L. Fejes-Tóth (Hungary) led to the new and fast developing field called discrete geometry. One can briefly describe this branch of geometry as the study of discrete arrangements of geometric objects in Euclidean, as well as in non-Euclidean spaces.

Who is the founding father of mathematics? Archimedes is considered the father of mathematics because of his notable inventions in mathematics and science. He was in the service of King Hiero II of Syracuse. At that time, he developed many inventions. Archimedes made out a pulley system designed to help the sailors move objects up and down that are weighty.

What is the Ramsey theory of discrete mathematics? Theorem 1.7 (Ramsey's Theorem) For positive integers k, ℓ_1, \dots, ℓ_r , with each $\ell_i \geq k$, there exists a least positive integer $N = R_k(\ell_1, \dots, \ell_r)$ such that, for every r -colouring of all k -subsets of $[N]$, there exists a monochromatic set of size ℓ_i for some $i \in [r]$.
